PROVINCIAL SYNOD OF THE CHURCH OF ENGLAND.

The following is the business which passed this Synod at its recent meeting in Montreal:

1. A resolution reaffirming and declaring our assent to the constitution and past acts of the provincial synod.
2. An address to the general Convention of the Protestant Episcopal church in the United States.
3. The appointment of a joint committee of both houses to consider "what amendments or alterations may be advantageously made in the church temporalities act," and a petition to the Legislature respecting the same.
4. An address to His Grace, the Archbishop of Canterbury, on the subject of a national synod of the Bishops of the Anglican church at home and abroad.
5. The appointment of a joint committee of both houses "for the purpose of compiling a psalm and hymn book.
6. A resolution respecting the use of the words "House of Bishops" wherever occuring in the acts of the synod.
7. A memorial to the Legislature respecting the rectory lands.
8. Canons "on the election of Metropolitan and Bishops of the Diocese of Montreal."
9. Canons "on submission of clergy to the canons of the Provincial and Diocesan Synods."
10. Canons "on the powers of the Metropolitan."
11. A canon "on the trial of a bishop."
12. A canon "on the election of delegates to the provincial synod; and an alteration of the 28th article of the constitution on the same subject.
13. An address to the Convocations of Canterbury and York.
14. A resolution respecting a committee to enquire into the state of various Indian missions.

ALLEGED MURDER NEAR BURFORD.

Brantford, Oct. 2.

A murder is said to have been perpetrated near the checkered sheds, Burford, today. A boy was driving into Brantford and picked up a man to give him a ride on his way. It is thought some difficulty arose between them, and that the man beat the boy with a club or stone until he killed him. The man is in custody, and the case is being investigated at Burford.

WENTWORTH ELECTION.

Dundas, Oct. 2.

At a Reform meeting held at the Elgin House here to-day, there was a very full representation from all parts of the North Riding, though the notice given was short, yet the meeting was a most respectable and influential one—there being from seventy to eighty present. After some deliberation, it was decided that a regular convention should be held on Monday the 9th instant, at the same hour and place. There are to be four delegates from each township ward, and three from each ward of Dundas.

ITEMS OF NEWS.

The Spinning Wheel.—Domestic Industry.—Last winter Her Majesty was graciously pleased to favour Mr. Peter Stewart, spinning wheel maker, Spittalfield, Perthshire, with an order for a two handed spinning wheel for Her Majesty's use. Mr. Stewart, who is an adept in his profession, having spent upwards of sixty years in it, has with great care and taste executed Her Majesty' order. The wheel was sent to the Queen before her departure from Balmoral. A photograph of Her Majesty, sitting at the spinning wheel, was also allowed to be taken. The maker has been instructed to manufacture another wheel of home wood, to be ready for Her Majesty on her return to Balmoral in the autumn.—Scotsman.

Coffin's Fisticuffs.—An English paper says: At the Dublin police court on the 26th ult., Capt. Cuffe, Canadian Commissioner, appeared on a summons, charged with having assaulted Mr. J. F. Isolin, Superintendent of the Exhibition, in that building on the 22nd of August. Captain Cuffe alleged that Mr. Isolin called him a liar, and admitted that he then raised his cane and struck him. Mr. Isolin denied that he had given any such provocation. Mr. Isolin was also cross-examined to show that Mr. Cuffe was only acting in the matter as the chivalrous defender of one of the female attendants of the Exhibition, to whom Mr. Isolin had made indecent overtures. This was disproved, and Capt. Cuffe was committed for trial but admitted to bail.

Accident on the Grand Trunk.—As the express train from Montreal was nearing Coburg, on Saturday night, at about ten o'clock, an accident occurred occasioning a delay of seven hours. It appears that the cars ran off the track, and the axle of the tender and the coupling broke, disconnecting the engine car from the others. It then went on about a quarter of a mile, the others following. The velocity of the hind cars was such that when they struck the post office and baggage cars they turned them completely round, and forced them into an embankment about six feet, throwing the second passenger car almost over. Fortunately there were but five passengers in the second-class car at the time, one of whom was considerably bruised. The mail conductors received much injury, but not of a very serious nature. No blame is attachable to the railway company, or to any of the employers, and it is but justice to state that as soon as the accident was known to the railway authorities every care and attention was shown to all who were on the train at the time of the accident. The Port Hope and Lindsay railway company kindly sent a train to the scene of the accident and removed the passengers to Port Hope, and a special train from Toronto went on Sunday morning and brought them to this city, where they arrived at eight o'clock.—Leader of Tuesday.

Burlat.—This noted individual, whose escape from jail at Port Clifton we noticed some time ago, passed through Detroit a day or two since in the guise of a farmer, and succeeded in reaching Canada unnoticed. He was the guest of some friends in Windsor for several hours. It is supposed that he has gone East.—Detroit Free Press.

Marriage in High Life.—The eldest son of a certain Honorable, has recently been discovered to have acted in a manner contrary to the usages of well-bred society. In a word he has been guilty of allying himself to plebleian blood; he has married a servant girl; and the consequence is trouble in his family. The youth was never known for anything remarkable beyond being what in common parlance is termed 'fast.' Report says he took a fancy to the girl in question, and to his credit be it spoken, he sent her to school some two years ago; and she now comes out greatly improved. She is spoken off as a very nice young woman, and, every body says vastly superior to her husband. So that after all there should not be so much noise about the affair.—Hamilton Correspondence.

Dr. Mackay.—The Montreal Telegraph says that Dr. Mackay is incensed at the Canadian Government because they did not pay him more attention, and that one or two annexationists in Montreal got hold of him while he was in the dumps, and pumped into his poor brain the ideas with which he had astray his employers in Printing House Square.

The U. S. Army.—Washington, Oct. 2.—On the first of last January there were 200 general hospitals in the country, with thousands of patients under treatment. At the present time there are but 40, containing about 7,000 patients, and by the aid of thoroughly scientific surgical treatment, together with a liberal expenditure of money for wooden legs, arms and things of that sort, the medical department is rapidly reducing that number. No expense is spared by the government in starting its shattered defenders in the world again as nearly as possible as good as new.

It is generally believed in military circles that but a small force will be necessary to protect our North-western frontiers, and that a large portion of the army concentrated there will be speedily dispensed with.

Uncommon Niggers.—"Maria," said a lady in Indianapolis to her colored chambermaid, "that is the third silk dress you have worn since you came to me. Pray how many do you own?" "Only seven, Miss, but I'e savin' my wages to buy another." "Seven! What use are seven silk dresses to you? Why, I don't own so many as that." "Spec not, Miss," said the smiling darkey; "you doesn't need 'em so much as I do. You see, 'mong you white folks everybody is quality, but we 'bettermost kind of culled persons has to dress smart to 'stinguish ourselves from common niggers."

Execution of a President.—The American papers give some details of the execution of ex-President Barrios, of San Salvador. On the morning of August 29th he was conducted to the scaffold, escorted by a small military force. The sentence was read, and the Bishop exhorted and prayed with the condemned man. Barrios bade farewell to several friends and charged General Gonzales with the care of his remains. He requested his confessor to have masses said quietly and without pomp for the repose of his soul, and then met death with entire resignation.

Lower Canada and Federation.—The Quebec Canadien, a Ministerial journal, taking note of the Globe's declaration, that in the event of Confederation failing next session Federation must be taken up, says that in such circumstances Lower Canada must take the same stand against Federation, that New Brunswick now takes against Confederation.

VARIEGATED FIERY HONORS.

A correspondent of the Times gives the following account of the reception by the united English and French fleets of the toast "The Queen" at the recent interchange of civilities:—

"Just as the health of Her Majesty had been proposed by the French Minister, a signal for the commencement of an illumination of the fleet was given by the discharge of a rocket from the Victory and the firing of one of her guns. One is liable to exaggerate the effect of scenes, however picturesque, made brilliant at night by a profusion of light, but no words could depict the surpassing brilliancy of the scene which followed instantaneously the last flicker of that rocket from the Victory. As if by magic, every ship in the allied fleets was illuminated. A salute of 21 guns was fired from the fleets, and as the echo of the last shot died away every ship in the squadrons was so illuminated, by means of red, white, and blue lights placed in every port, at both broadsides, and both yard-arms, that the object which only a few moments before looked, even at a short distance, so grim and shadowy became, at once transformed into a ship of light, revealing to view the outline of her slenderest spar. Rockets were then sent up in clusters from the whole of the fleet, which as they burst into heavens, expanded into bouquets of red, white and blue, and then gradually melted away in the still air, but only to to be followed at short intervals by other clusters of rockets bursting and descending in an equally brilliant shower. As the long lights only burn for a couple of minutes, three were lighted in succession in each port, and as each set of lights died away, and the illumination seemed to be coming to an end, the full blaze of its splendor was again restored with the same magical rapidity with which it was first created. When the three sets of long lights were nearly burnt out a bouquet of 24 signal rockets was fired from each ship, and immediately after the fleet faded from the view of the thousands of spectators who lined the ramparts at Portsmouth and all was again comparative obscurity at Spithead. The illumination lasted for about 20 minutes throughout the whole of which time the St. Vincent, the Duke of Wellington, and the former men-of-war in the harbor displayed lights at every porthole, causing the gentle ripple on the waves to sparkle like diamonds. The town itself was almost extensively and brilliantly lit up during the night, the combination of the illumination of the houses near the dockyard gates with the magnificent illumination over the gateway itself shedding a radiance like that of a bright summer sun at noon on the roadway and the pavement below. A very grand spectacle could scarcely have been witnessed on a fairer night.

Grand Trunk Arrangement.—Mr. Brydges has made a most liberal arrangement with reference to the removal of the Government employees from Quebec to Ottawa. The terms offered are for a car load of furniture $45; for the civil servants and their families, half fare, viz.: $3.20 from Quebec to Ottawa for each adult; half price for children between four and twelve years of age.

The Steamer "Spartan."—This vessel it will be remembered, was raised to the required level on Friday last. A hole was found in her, where she struck the rock, of 22 feet in length, with an average width of 8 inches. The extent of this accounts for the rapidity with which she went down. To-day the hole, with the assistance of divers, is to be stopt, when pumps will be immediately placed on board and the water taken out, after which, it is expected, she will be in a condition to be taken into port, where, it is hoped, she will arrive to-morrow evening.—She will be taken to Cantin's dry dock for repairs. The cost of raising her simply is estimated at $5000. The 'Spartan' has sustained very little damage, except in her joiner work, which had to be cut away to leave room for the timber arches. She will be fitted up again in every respect in as good style as before the accident, and will be ready to take her place in the line at the opening of navigation next spring.

The New York Tribune says, "the reason why Drake's Plantation Bitters are so universally used and have such an immense sale, is that they are always made up to the original standard, of highly invigorating material and of pure quality, although the prices have so largely advanced," &c.

The Tribune just hits the nail on the head. The Plantation Bitters are not only made of pure material, but the people are told what it is. The Recipe is published around each Bottle, and the bottles are not reduced in size.—At least twenty imitations and counterfeits have sprung up. They impose upon the people once and that's the last of them.

The Plantation Bitters are now used in all the Government Hospitals, are recommended by the best physicians, and are warranted to produce an immediate beneficial effect. Facts are stubborn things.

New Bedford, Mass., Nov. 24, 1863.

Dear Sir:—I have been afflicted many years with severe prostrating cramps in my limbs, cold feet and hands, and a general disordered system. Physicians and medicine failed to relieve me. Some friends in New York, who were using Plantation Bitters, prevailed upon me to try them. I commenced with a small wine-glassful after dinner.—Feeling better by degrees, in a few days I was astonished to find the coldness and cramps had entirely left me, and I could sleep the night through, which I had not done for years. I feel like another being. My appetite and strength have also greatly improved by the use of the Plantation Bitters.

Respectfully,
JUDITH RUSSEL."

* * * The Plantation Bitters have cured me of a derangement of the kidneys and the urinary organs that has distressed me for years. It acts like a charm.

C. C. MOORE,
254 Broadway."

If the ladies but knew what thousands of them are constantly relating to us, we candidly believe one half of the weakness, prostration and distress experienced by them would vanish. James Marsh, Esq., of 159 West 14th St. N. Y., says, "he has three children, the first two are weak and puny, his wife having been unable to nurse or attend them, but that she has taken Plantation Bitters for the last two years, and has a child now eighteen months old which she has nursed and reared herself and both are hearty, saucy and well. The article is invaluable to mothers," &c.

Such evidence might be continued for a volume. The best evidence is to try them.—They speak for themselves. Persons of sedentary habits troubled with weakness, lassitude, palpitation of the heart, lack of appetite, distress after eating, torpid liver, constipation, diabetes, &c., will find speedy relief through these Bitters.

Every bottle for exportation and sale out of the United States has a metal cap and green label around the neck.

Beware of refilled bottles. See that the cap has not been mutilated. Any person pretending to sell Plantation Bitters in bulk or by the gallon is an imposter. We sell it only in bottles.

Sold by principal dealers throughout the habitable globe.

Waltham watches and Ayer's Pills are said to be the highest specimens of American art, each of their kind: one in mechanics and the other in medicine. With a Waltham watch in our pocket and a box of Ayer's Pills in the other, you should be at your work in season with the health to pursue it.—[Advertiser, Norway, Me.

AYER'S PILLS.
ARE you sick, feeble and complaining? Are you out of order with your system deranged and your feelings uncomfortable? These symptoms are often the prelude to serious illness. Some fit of sickness is creeping upon you, and should be averted by a timely use of the right remedy. Take Ayer's Pills, and cleanse out the disordered humors—purify the blood, and let the fields move on unobstructed in health again. They stimulate the functions of the body into vigorous activity, purify the system from the obstructions which make disease. A cold settles somewhere in the body, and deranges its natural functions. These, if not relieved, react upon themselves and the surrounding organs, producing general aggravation, suffering and derangement. While in this condition, take Ayer's Pills, and see how directly they restore the natural action of the system, and with it the buoyant feeling of health again. What is true and so apparent in this trivial and common complaint is also true in many of the deep seated and dangerous distempers. The same purgative effect expels them. Caused by similar obstructions and derangements of the natural functions of the body, they are rapidly and many of them surely cured by the same means. None who know the virtue of these Pills will neglect to employ them when suffering from the disorders they cure, such as Headache, Foul Stomach, Dysentery, Bilious Complaints, Indigestion, Dèrangement of the Liver, Costiveness, Constipation, Heartburn, Rheumatism, Dropsy, Worms and Suppression, when taken in large doses.
They are Sugar Coated, so that the most sensitive can take them easily, and they are surely the best purgative medicine yet discovered.
AYER'S AGUE CURE,
For the speedy and certain Cure of Intermittent Fever, or Chills and Fever, Remittent Fever Chill Fever, Dumb Ague, Periodical Headache or Bilious Headache, and Bilious Fevers; indeed, for the whole classes of diseases originating in biliary derangement, caused by the malaria of miasmatic countries.
This remedy has rarely failed to cure the severest cases of Chills and Fever, and it has this great advantage over other Ague medicines, that it subdues the complaint without injury to the patient. It contains no quinine or other deleterious substance, nor does it produce quinism or any injurious effect whatever. Shaking brothers of the army and the west, try it and you will endorse these assertions.
