FLAX, HEMP, JUTE AND RAMEEA FIBRE.
Prepared without Scutching
BY
J. Hill Dickson's Patent Portable Machine
To be worked by
HAND, WATER, OR STEAM POWER.
117 Gt. Dover Road Boro, London.

THE advantages and economy gained in converting GREEN FLAX STRAW by Machinery, into Stronger and Finer fibre for being spun, on Cotton, Silk, Worsted, or Flax Spinning Machinery, than if retted by steeping in either Cold or Hot Water (which process frequently by over decomposition produces as much Tow, as long Fibre) arises from the following facts, respecting a system that avoids Tow and Waste.

1st.—The seed bolls or husks can be taken off in the field as the flax is pulled, by turning the side-projecting rollers that are upon the ends to permit of only about six inches of the top or seed ends, to pass down between them to break the seed bolls without crushing or injury to the seed, or taking off any portion of the fibre.

2nd.—The wood inside the fibre is so crushed and ground into dust when laid on the grate-like moving table, which admits of such stuff falling through, that whether the Flax Straw, Retted in the usual way, the woody and dusty substance is entirely got rid of without scutching, and the reeds or tar (it is called) half of the fibres are so preserved from being broken into tow, that they appear like as many narrow ribbons. Flax spinners are certain to appreciate this great improvement in preparing, as no Tow or Waste can be seen, and as a consequence there is a gain of fully one-third more fibre from a given weight of flax straw than by any other invention or system known, see report of Messrs. Marshall & Co. of Partington & Leeds, taken from the Belfast Flax Society reports and copied at page 314 in the work of Dixon on the Fibre, Plants of India Flax, Hemp, &c., &c.

3rd.—The Flax and Hemp being when free from the wood, covered over with a natural green gum, is made perfectly soft and two-thirds White, by a simple run of Hot Water, as the fibre passes through in a few minutes, the washing part of the invention, and then wrung dry at the end, by this means the fibres are stronger and better adapted for the Flax Spinners than any retted flax, and the yarns from it will be nearly white, without alkaline or acid to injure the strength, and ready for wearing without boiling.

4th.—If very fine quality be required for Cotton, Silk or Worsted spinning purposes, the cothonizing part of the Machine must be worked and the soaning liquid applied and by such means flax equal to the best Courtrai, Flax at £100 £150 per ton can be produced, and practical instructions will be given to parties purchasing the machine by the Inventor and Patentee.

An excellent pudding may be made by merely mixing some of the flour and water together, boiling it in a cloth, or steaming it, with room for expansion, and using a little nice melted butter with sugar for sauce. WORCESTERSHIRE SAUCE
PRONOUNCED BY CONOISSEURS TO BE THE ONLY GOOD SAUCE AND APPLICABLE TO Every Variety of DISH.

Extract of a letter from a medical gentleman at Madras to his brother at Worcester, May 1851. "Tell Lea and Perrins that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

Worcestershire Sauce.
L. & P. have discovered that several of the Foreign Markets have been supplied with SPURIOUS IMITATIONS, the labels closely resembling those of the genuine Sauce, and in one or more instances the name of L. and P. forged.
L. and P. will proceed against any one who may manufacture or vend such imitations, and have instructed their correspondents in the various parts of the world, to advise them of any infringement of their rights.

$10 A DAY TO AGENTS.
Lloyd's Great Topographical Railway and County Map of England, Ireland, Scotland and Wales.
SIX Feet Large, mounted and varnished; cost $100,000 and four years' time; was finished July 28, and is the best map ever made since the world was formed; shows 200,000 cities, towns, villages, market places, post offices, castles, country seats, and 38,000 railways and railway stations, with the distance between each station marked plainly, and the official name and total length of each railway in actual operation up to June, 1865 is given. The railway stations are all numerically and alphabetically arranged. The lakes, rivers, hills, and mountains are exhibited, with the altitude of each in feet, made from trigonometrical surveys by our own engineers, draughtsmen and photographers, sent to England expressly to make a superior map of that country; the whole engraved on steel, colored superbly in counties, mounted and varnished. Price 8 shillings sterling ($2). No map at $20 can compare to this. Canvassers throughout the world wanted. Also men with a small capital to go to Canada, Chicago, Cincinnati, Nova Scotia, New Brunswick, East and West Indies, Australia and California, to open offices. Can make a fortune wholesaling this and other maps to sub-agents. Eighty thousand copies of this map were subscribed for in England before going to press, as can be shown by our agents' letters to us.—Ten new maps now under way.

AMERICAN WATCHES.
THE AMERICAN WATCH Co.
OF WALTHAM, MASS.,
Having recently increased their facilities for manufacturing Watches, by large additions to their buildings and to their force of workmen, are desirous of introducing their products into Canada, a market which they have hitherto been unable to supply, owing to the large demand for their Watches in the United States.
The reputation which these Watches have acquired in the States, may be judged of by the fact that since the Company began their business, nearly 150,000 Watches of their manufacture have passed into use among the people, and, have given, with rare exceptions, the utmost satisfaction to all who have tried them. They have superseded in this market all other Watches coming within the range of their prices.—The Company have attained this result solely by making
GOOD WATCHES,
AND SELLING THEM AT MODERATE PRICES.
At the present rate of Exchange between the two countries, American Watches can be sold for Canada currency at about one half of the currency prices in the States; and as we have not advanced the prices of our Watches since the war commenced in proportion to the rise of gold, this state of exchange renders them cheaper, in reality, than they were before the war.
The Company do not solicit orders for single Watches, but will be happy to furnish every one with full information respecting them, and to fill such orders from the Watch Trade as they may be favored with.
