FLAX, HEMP, JUTE AND RHEEA FIBRE.
Prepared without Scoutching
BY
J. Hill Dickson's Patent Portable Machine
To be worked by
HAND, WATER, OR STEAM POWER.
117 Gt. Dover Road Boro, London.
THE advantages and economy gained in converting GREEN FLAX STRAW by Machinery, into Stronger and Finer fibre for being spun, on Cotton, Silk, Worsted, or Flax Spinning Machinery, than if retted by steeping in either Cold or Hot Water (which process frequently by over decomposition produces as much Tow, as long Fibre) arises from the following facts, respecting a system that avoids Tow and Waste:
1st.—The seed bolls or husks can be taken off in the field as the flax is pulled, by turning the side projecting rollers that are upon the ends to permit of only about six inches of the top or seed ends, to pass down between them to break the seed bolls without crushing or injury to the seed, or taking off any portion of the fibre.
2nd.—The wood inside the fibre is so crushed and ground into dust when laid on the grate-like moving table, which admits of such stuff falling through, that whether the Flax Straw, Retted in the usual way, the woody and dusty substance is entirely got rid of without scutching, and the reeds or (as it is called) harl of the fibres are so preserved from being broken into tow, that they appear like as many narrow ribbons. Flax spinners are certain to appreciate this great improvement in preparing, as no Tow or Waste can be seen, and as a consequence there is a gain of fully one-third more fibre from a given weight of flax straw than by any other invention or system known, see report of Messrs. Marshall & Co. of Partington & Leeds, taken from the Belfast Flax Society reports and copied at page 214 in the work of Dixon on the Fibre, Plants of India Flax, Hemp, &c., &c.
3rd.—The Flax and Hemp being when free from the wood, covered over with a natural green gum, is made perfectly soft and two-thirds White, by a simple run of Hot Water, as the fibre passes through in a few minutes, the washing part of the invention, and then wrung dry at the end, by this means the fibres are stronger and better adapted for the Flax Spinners than any retted flax, and the yarns from it will be nearly white without alkalies or acids to injure the strength, and ready for weaving without boiling.
4th.—If very fine quality be required for Cotton, Silk or Worsted spinning purposes, the cothonizing part of the Machine must be worked and the scutching liquid applied and by such means flax equal to the best Courtrai, Flax at £10 to £150 per ton can be produced, and practical instructions will be given to parties purchasing the machine by the Inventor and Patentee.

SELF-RISING OR PATENT FLOUR.
I have received a small quantity of Patent Flour, and as most of my customers are fond of good things, I would recommend it as being very good for bread, Windsor tea cake, very superior luncheon cake, pastry, &c., &c. An excellent pudding may be made by merely mixing some of the flour and water together, boiling it in a cloth, or steaming it, with room for expansion, and using a little nice melted butter with sugar for sauce. Pancake fritters &c., are very superior when made of this flour—no eggs need be used.

CAUTION.
LEA AND PERRINS
Beg to caution the Public against spurious imitations of their celebrated
Worcestershire Sauce.
L. & P. have discovered that several of the Foreign Markets have been supplied with NUMEROUS IMITATIONS, the labels closely resembling those of the genuine Sauce, and in one or more instances the name of L. and P. forged.
L. and P. will proceed against any one who may manufacture or vend such imitations, and have instructed their correspondents in the various parts of the world, to advise them of any infringement of their rights.

AMERICAN WATCHES.
THE AMERICAN WATCH Co.
OF WALTHAM, MASS.,
Having recently increased their facilities for manufacturing Watches, by large additions to their buildings and to the force of workmen, are desirous of introducing their products into Canada, a market which they have hitherto been unable to supply, owing to the large demand for their Watches in the United States.
The reputation which these Watches have acquired in the States, may be judged of by the fact that since the Company began their business, nearly 150,000 Watches of their manufacture have passed into use among the people, and have given, with rare exceptions, the utmost satisfaction to all who have tried them. They have superseded in this market all other Watches coming within the range of their prices.—The Company have attained this result solely by making
GOOD WATCHES,
AND SELLING THEM AT MODERATE PRICES.
At the present rate of Exchange between the two countries, American Watches can be sold for Canada currency at about one half of the currency prices in the States; and as we have not advanced the prices on our Watches since the war commenced in proportion to the rise of gold, this state of exchange renders them cheaper, in reality, than they were before the war.
The Company do not solicit orders for single Watches, but will be happy to furnish every one with full information respecting them, and to fill such orders from the Watch Trade as they may be favored with.
