The Rattan Factory here is especially busy on baby carriages and go-carts, and by the spring rush of orders that are in there is no evidence that the dealers in the various towns believe that race suicide is becoming epidemic in the land. If other factories throughout Canada are working on baby carriages and go carts anything like the local institution we see where pedestrians in many towns will have to take the road unless nurse girls travel more in single file than they do in Walkerton, for on assembling here they pass down the pavement side by each like the Light Brigade moving to the charge at Balaclava.
