Gasoline and coal oil will not make a good mixture for motor cars, any more than the latter material will prove satisfactory. An Orangeville oil tank man reversed operations with two local dealers, dumping coal oil into the gasoline tanks and selling other dealers gasoline for coal oil. Two doctors filled their car tanks that night and on Sunday both were stranded in the country. The oil worked all right for a short time, but once the car stopped it refused to start again. Early Monday morning the cause of the trouble was ascertained and steps taken to rectify the error, which might easily have proved more serious.
