Guard Your Gasoline Ration Book

KEEP IT ON YOUR PERSON • DO NOT LEAVE IT IN YOUR CAR

NOW that you have your 1943-1944 gasoline ration book, it is up to you to keep it at all times in a safe place. If it is lost, burned, or stolen, you will be deprived of coupons which will not be replaced. In this regard, the policy of the Oil Controller is as follows:

• If, through negligence, you lose your gasoline ration book before October 1, 1943, you may be allowed no more, and perhaps less, than half the coupons to which you would be entitled if you were making an original application.

• If, through negligence, you lose your ration book on or after October 1, 1943, you may be allowed no more, and perhaps less, than 25 per cent of the coupons to which you would be entitled if you were making an original application.

The new gasoline rationing system, effective on April 1, will be strictly enforced. Under its provisions, the motorist, as well as the service station attendant, is held responsible if any infractions occur. It is contrary to the orders of the Oil Controller:

1. To purchase gasoline with 1942-1943 coupons.
2. To purchase gasoline unless you have the correct category sticker affixed to your windshield.
3. To detach coupons from your own book. (The removal of the coupons is the duty of the attendant.)
4. To have in your possession a gasoline ration coupon not attached to, and forming a part of, a gasoline ration book.
5. To have in your possession a gasoline ration book other than the book issued in respect of a vehicle you own, or in respect of a vehicle driven by you with the full consent of the real owner.
6. To alter, deface, obliterate, or mutilate any gasoline ration book or coupon.

If you sell your motor vehicle, remember that before making delivery you must remove the windshield sticker or stickers. Remember also that after the sale is completed, you must mail to the nearest Regional Oil Control Office in your province the gasoline ration book or books issued for the vehicle.

LET THERE BE
No More Idle Hens
THIS YEAR

The Government is urgently requesting, for this year, a heavier egg production than ever before. The export requirements to Great Britain are enormous,—and these requirements must be filled. The home market will undoubtedly be good due to meat rationing in the near future.

Taking the above facts into consideration you are assured of a good market with reasonably good prices, so, do your bit to help the present situation.

Meat Lockers

Meat rationing in the near future is almost a certainty and, while we do not know how it will affect the average householder, it was announced that the farmer may continue to kill for his own use only.—So we ask the farmers to take advantage of our meat locker facilities while space is still available. For fruits and vegetables lockers will be extensively used this year.
