Harrasing Stallion Owners

The Ontario Government has a man going through the country harrassing the owners of stallions who have failed to have printed in their advertisements the whole of the certificate of enrolment issued under the names of McEwen and Wade. The owners of stallions in their cards and posters odserve this fool law scrupulously, but in their newspaper advertisements most of the owners think the enrolment number and class should be sufficient. However, this does not satisfy the enrolment board, which demands that the certificate—and whole certificate with all its repetitions—shall be plastered wherever a horse advt. appears in a neat frame. Evidently this is an invention of the artistic inspector. As this certificate takes fully two inches in readable type the cost of publication to the horse owners of Ontario must be a considerable sum of money, added to the annual fees exacted. The U. F. O. should take up this question of red tape annoyance of stallion owners.

The next move we may expect from the heavy thinkers on the "enrolment board," which is really a license board, will be to have each stallion wear over his breast a plate about the size of an auto license. This improvement may be expected if the Carls-Rite Walker House St George clique, hear of it.—Brampton Banner and Times.

Some Slip, This

A bottle of liquor slipped out of the pocket of a farmer from the country the other day and broke right under the nose of our keen scented chief, who pronounced it whiskey and haled the party before P. M. Allen. Result, a fine of $200 and $8 costs. A soninlaw from a neighboring town, who was in the other's company, was fined $10 and $5.50 costs.—Mt. Forest Confederate.

New Inventions

We take pleasure in announcing to the public that in the future the Phonola will be equipped with a new Universal Seamless Tapered tone arm which does away with all attachments. The entire arm is beautifully designed and finished, and is a marked contrast to the cheap dye cast arms seen on other makes of Phonographs.

It is the only Universal tone arm that is scientifically designed and the only one that will play all makes of records perfectly.

The Phonola will also be equipped with a new Aluminum Reproducer fitted with a special insulated rubber connection which eliminates metallic sounds from being transmitted to the Amplifier.

Equipped with these two new devices, the Phonola takes another step in advance of all competitors as furnishing the truest, clearest and sweetest tone it is possible to reproduce.
