Inflation and Deflation... Evil Companions

Past wars have always brought some degree of inflation.

Goods were scarce... Prices and wages sky rocketted to unnatural heights.

Then one day the war stopped . . .

in due time goods became plentiful again.

Scarcity prices could no longer be demanded

and "spiralling" prices went "pop"

and came down with a bang.

people stopped buying because they thought prices would go still lower

merchandise dropped in value—retailers went bankrupt

factories closed and unemployment followed

farms were foreclosed

distress was general and deflation was in the saddle.

That is why in this war prices are controlled—so that they will not ruin buyers in a rise or sellers in a slump.

Price ceilings—wage and salary controls—rationing—Victory Bonds—increased taxation—are all part of a grand strategy to head off Inflation—thus preventing Deflation.

PREVENTION OF INFLATION IS THE BEST PROTECTION AGAINST DEFLATION

LISTEN TO "IN THE SPOTLIGHT" RADIO PROGRAMME EVERY SUNDAY NIGHT 7.30 p.m., E. D. T.

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing further increases in the cost of living now and deflation later.
