"He thinks he did, mother."

Brother, Should You Spend a Dime?

A dime is small change! (10¢) But when a lot of dimes march out of your pocket they soon become dollars that start to fight other dollars, for the new neckties, dresses or furniture left for us to buy. This battle of the dollars is called INFLATION because it starts prices rising! 10¢ 20¢ 30¢ And the higher prices go...the less your dollar is worth! For instance, during the last war, people had to pay 23¢ lb. for sugar that you get for 8¢ lb. today. A voile night dress was $6.95 compared to the $1.98 you pay now. Your dollar buys more goods, is worth more than the dollar of 1914-18. Price ceilings and other anti-inflationary measures have helped keep it's value high. And remember! Every time you use your money wisely to pay off a debt BILL or to increase your savings BOND when you refuse to hoard goods or patronize black markets...it makes your dollars worth MORE!

Make This Pledge Today!

I promise to give my support to keeping the cost of living down. I will buy only what I need. I will observe the ceiling whether buying or selling goods or services. I will pay off old debts, save for the future, invest in Victory Bonds and War Savings Certificates. And I will support taxes which help lower the cost of living.

Keep Your Dollar Value High!
