IT COULD BE DONE

A Land Army girl and a handsome farm lad were walking along a road together. The farm lad was carrying a large pail on his back, holding a chicken in one hand, a cane in the other, and leading a goat. They came to a dark lane. Said the girl: "Oh, its so dark, here, that I am afraid to walk with you. You might try to kiss me." Said the farm lad: "How could I, with all these things I'm carrying?" "Well, suggested the girl, "you might stick the cane in the ground, tie the goat to it and put the chicken under the pail."

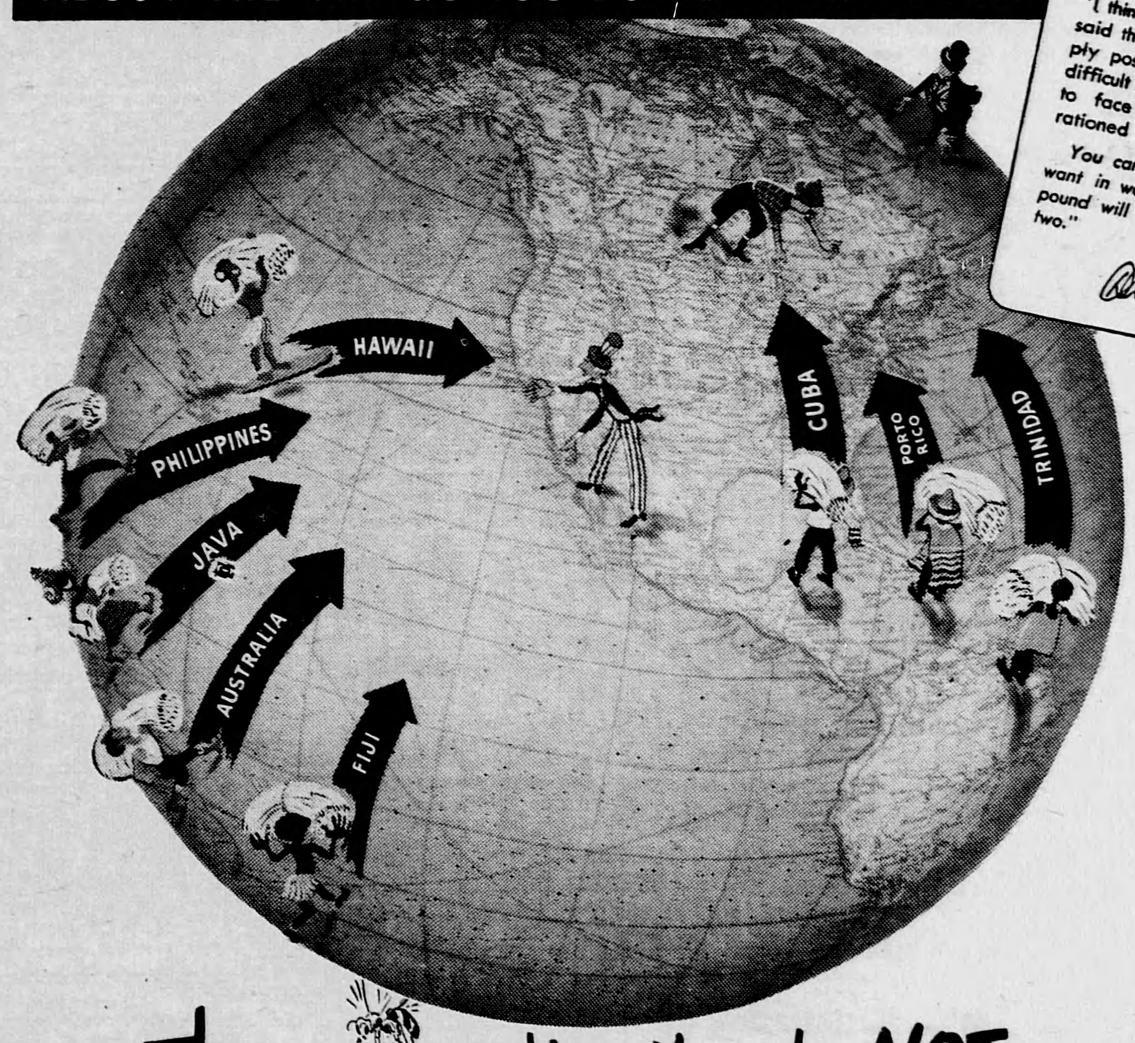
ABOUT THE THINGS YOU BUY IN WARTIME...



The sugar situation is NOT sweet

FOUR-FIFTHS OF THE SUGAR CANADA CONSUMES HAS TO BE IMPORTED

This map shows where Canada, Great Britain and the United States got their sugar in the good old days of peace. Our three countries take practically all the exportable sugar from these major sugar-exporting areas.

But supplies have either been cut off by enemy occupation of the country—as in the case of Java and the Philippines, or their production radically reduced by shortage of workers, as in the case of Hawaii, Porto Rico, Australia, Trinidad, Fiji.

Even the production of beet sugar in Canada and the United States has been drastically cut by labour shortage. In both countries the '43 sugar beet crop was forty per cent less than in '41. The only country to show an important increase is Cuba, where output had for years been deliberately restricted. But its increase has not been sufficient to offset the losses elsewhere—let alone meet the increased demand.

ROLLING ON SUGAR

The war has brought some unusual demands on the United Nations' sugar pool. Vast quantities have been taken for making industrial alcohol used in the manufacture of synthetic rubber (tires, etc.) as well as T.N.T. and smokeless powder. For instance, the explosive to fill five 16-inch shells requires as much sugar as is produced on an acre of the finest sugar land. This year Cuban sugar alone used for making industrial alcohol will equal Canada's normal sugar imports for more than two years.

THE SUPPLY IS SHARED

All sugar supplies are pooled and under the control of the Combined Food Board of the United Nations, which allots supplies to Canada, United States and Great Britain on a uniform basis.

DO WE NEED MORE SUGAR?

A century ago the whole world didn't consume as much sugar as Canada does today. Our sweet tooth has been acquired in quite recent times. Sugar rates high for its energy value, but starchy food is a good substitute.

WE'RE LIVING ON OUR SUGAR CAPITAL

At the time of "Pearl Harbour" the United Nations had a reserve stock-pile of about 3 million tons, but for the last 3 years we've been using more than has been produced—and dipping heavily into "reserve." Liberated nations will have to dip in too. Extra good crops could improve the situation, but greatly increased supplies are not in sight. If current consumption keeps up, we could be very short of sugar next year. We must do the utmost to conserve our supplies.

RATIONING WAS STARTED BECAUSE OF SHORTAGE OF SHIPS. IT MUST BE CONTINUED BECAUSE WORLD STOCKS ARE DEFICIENT
