CHURCHILL VISITS 'MONTY' ON WESTERN FRONT

After confering with Field Marshal Sir Bernard L. Montgomery, Prime Minister Winston Churchill, smoking big cigar leaves small station in Belgium. Following brief visit to Western Front English leader returned to London early in January.

'We Have Given Everything — We Ask Nothing In Return': Churchill

Prime Minister Churchill brought the House to its feet cheering when he asserted last week:

"We seek no territory, we covet no oil fields, we demand no bases for the forces of the air or of the sea.

"We do not set ourselves up in rivalry of bigness or might with any other community in the world. We have given and we shall continue to give everything we have. We ask nothing in return except that consideration and respect which is our due, and if that were denied us we shall still have a good conscience.

"Let none either in our country or commonwealth or in the outside world misname us, traduce our methods. Our actions are no doubt subject to human error, but our actions in small things and great are disinterested, lofty and true. I repulse those calumnies, wherever they come from, that Britain and the British Empire are selfish, power greedy and land greedy and obsessed by dark schemes of European intrigue or colonial expansion.

"The British Commonwealth and nation may rest assured that the Union Jack of freedom will forever fly from the white cliffs of Dover."

WHAT SCIENCE IS DOING

Anti-Freeze

As a fruit of the largest chemurgic experiment so far undertaken in Canada, scientists of the National Research Council now are turning out butylene glycol—a superior ant-freeze—as a by-product of wheat in a pilot plant overlooking the Rideau river.

Butylene glycol can be broken down chemically into several other useful substances, and research into these possibilites now is going on.

The plant produces 10 pounds of butylene glyco and six pounds of ethyl alcohol from a bushel of wheat.

At one stage of the work the investigators dug into a garden while a temperature of 80 degrees below zero prevailed to find a bacillus capable of fermenting wheat rapidly and directly.

They developed a strain called Aerobacillus polymyxa which cut the fermentation period from 10 days to three days.

A noteworthy feature of the extraction process is that off-grade or damaged wheat can be used, and such varieties often contain more starch and hence are more desirable than premium grades.

Photo Taken In Millioneth Of Second

Officials of the Westinghouse Electric and Manufacturing Company, Baltimore, have disclosed the development of an X-ray machine, which takes a picture in one millionth of a second.

The high-speed picture-taking machine was made in answer to a request from military ordnance engineers for a way to take pictures of an artillery shell as it passed through the muzzle of the gun and as it pierced a plate of armor, company spokesmen reported.

Socialists Would Kill Incentive

Socialists sneer at the man with initiative; hold in contempt the man who wants to build a business, make things, provide jobs, says the Financial Post. According to their plans, the job making is to be done by the politicians and the civil servants, with all of us the pawns in their game.

The author and lecturer, Dr. Donald Laird, gives a very apt illustration to this.

The trout is a fighting fish with lots of initiative. But scientists easily found a way to take it all out of him. They put a glass partition in his water tank; the trout in one end, a minnow in the other.

The trout flashed toward the minnow, crashed his nose on the glass. Again and again, he tried: again and again, got a crack on the nose. He watched the minnow carefully; for that day gave up the struggle.

Next day, he was again hurling himself after the minnow, pounding his snout on the glass. But he gave up sooner.

The third day, he tried again, gave up sooner.

A few more days, the partition was removed. But the trout's initiative was gone. He stayed in his own end of the tank. The minnow was completely safe.

There's a moral for those people who think we can safely try "just a little bit of socialism"; then change our political diet if it fails to produce the promised millenium.

The maker of jobs who gets a sock on the jaw from lawmakers and officials every time he shows drive and initiative and fighting spirit soon learns to stop trying. And the biggest loss is to the Canadian people as a whole.

Buckingham Palace Bombing Now Told

A bomb crashed through the roof of Buckingham Palace and through the Queen's apartment during the London blitz, it was permitted to disclose recently.

Eight men of the Palace Home Guard unit disposed of the three-foot-long explosive. Two of them, later commended for bravery, were Maj. John Cowan, a company commander who since has died, and Maj. Thomas Williams.

The King last week personally inspected this Home Guard unit at its stand-down parade. Every man had kept the three-year secret of the bomb and the damage it caused.

Aches and Pains of
RHEUMATISM
Your money will be returned by any drug store if one bottle of Ru-Ma does not show you the quick, easy way to get relief from the cruel, stubborn aches and pains of rheumatism. Ru-Ma must please you or money back. One bottle will convince you.

Itching Scalp—Loose Dandruff
Try This Home Treatment For Quick Ease and Comfort
Here is a clean powerful penetrating oil that brings speedy relief from the itching torture and discomfort.
Don't dig with fingernails, that only serves to spread the trouble. Just use equal parts of Moone's Emerald Oil and olive oil. Apply gently with the fingertips once a day and shampoo every fourth day. You'll find this treatment not only soothes the itching and torture but helps promote more rapid healing—loose floating dandruff becomes a thing of the past.
You can obtain Emerald Oil in the original bottle at any modern drug store.

VOICE OF THE PRESS

JUST A SUGGESTION

It would be "populaire" with many thousands of right-thinking Canadian, if a few "blocks" of concrete were dropped on the heads of those noisy, ant-British Bloc Populaire leaders down in Quebec.

—St. Thomas Times-Journal

—o—

STICKING TO IT

It is seventy-five years since chewing gum was patented and another great industry started on its way. Imagination, initiative and stick-to-itiveness did the rest.

—Winnipeg Tribune

Soviet Grapefruit

The first grapefruit grove in the USSR, in Georgia, will yield an estimated 100,000 grapefruit this year. Introduced from the United States only a few years ago, the grapefruit is gaining wide popularity in the USSR. Planting was halted by the war, but the groves in the sub-tropical zone are now being expanded.
