The problem this year was to get the crop saved. There is so much sweet clover among the grain in this section that, along with the heavy straw, it has been very difficult to cure. Fortunately the weather has been ideal for saving it.

If we remember rightly an Anti-Combine law was passed by the Dominion Government a few years ago This law appears to have remained a dead letter, at least nothing has recently been been heard of it. On the contrary, the Board of Commerce and Railway Board have and are fostering combines and setting a bad example in this pernicious practice, annihilating competition altogether, while the public suffers the consequences. It is high time now that this country got back to a pre-war competitive basis and dropped its Boards of Control and their highly paid officials.

Mr. Delbert Patton of Toronto is holidaying at his parental home here.

Mrs Wm. Wilcock is visiting her daughters in Toronto.

Miss Evada Wilson visited during the past week with her aunt at Burlington Beach.

Mrs. Boyd Thompson returned last week from a month's visit with friends at Silver Creek, N.Y.

The building up of tires and the manufacture of mackintoshes and other rubber goods will be one of the process exhibits at the Canadian National Exhibition this year.

McTavish & Son had two of the new Samson tractors delivered last week. One is now busy cutting harvest in the Valley and is giving wonderful satisfaction.

The municipalities interested have been notified that the government formally took over the Toronto and Sydenham Road as a provincial highway at noon on Sept. 1st.

Sugar manipulators are now bemoaning the fact that the drop in Sugar means big losses. What about the millions that the public have already lost through the bedevilment of the sugar business for the past couple of years? The public can scarcely be expected to shed tears if some of the sugar grafters are put out of business altogether.

The Durham Review grew "good sized potatoes in a coal ash heap, and asks "how's that," when coal ashes are supposed to have no nutritive or fertilizing value? Well, here is the answer. Place potatoes in a box without any earth whatever and they will produce "good sized" potatoes. Moisture is all they require to do the trick.

The regular monthly meeting and tea of the W. I. will be held at the home of Mrs. Hickling on Wednesday, Aug. 1, at 2.30. "Some things that make life worth while," by Mrs Clinton; "Success from different standpoints," by Mrs. W. A. Armstrong. Baking Com.—Mrs Akins, Mrs Crossley, Mrs McTavish and Mrs A. Stewart.

A nasty car collision took place a mile east of the village on Sunday, when a car driven by Bessie Mercer came up he road from Loucks' mill and turned to go to Eugenia. Another car came along at the same time from Eugenia and the two collided. Both cars were quite badly used up, but nobody was hurt.

The Owen Sound Sun Times printed a story last week to the effect that beans planted along with potatoes would prevent the ravages of the potato beetle. Somebody must have been "joshing" the reporter. Right in our own garden we have a patch of beans, and among the beans there are several hills of potatoes which came up from seed left in the ground last fall. These were left to grow. After reading the Sun article we went to examine them, and behold, they were stripped to the stalks by the bugs. No, beans won't scare em off—not this year—and our confrere with the shiney name has wasted about six inches of valuable newspaper space telling about something that won't.

The latest game laws of each province, including the International migratory Birds Act are included in Rod and Gun in Canada for August. This issue of Canada's sportsmen's monthly contains seven live blooded stories of adventure with canoe, gun, rod and trap in Canada. In addition to these stories of fact and fiction there are the usual high class Guns and Ammunition department for the gun crank; the Angling department for the Waltonian, and the Kennel and Conservation departments for admirers of the canine and lovers of true sport. A. Bryan Williams, the well known big game hunter, takes the reader on another "leg" of the hunting trip into the hills of British Columbia, after sheep and goats. Rod and Gun in Canada is published monthly by W. J. Taylor, Limited, Woodstock, Ont.

Scarcity of Small Homes

Materials and labour still too high to encourage building. There seems to be small prospect of a downward trend in construction materials, and the price of labor is still so high that the average man hesitates a long while before undertaking any repair job that

Safeguard that valuable home of yours

YOU can never afford to let your home deteriorate for lack of paint. Lately property values have risen so high that the cost of a few cans of paint is a trifling expense for the safeguarding of the home. With this knowledge there is a more complete understanding of paint economy and a belief that it pays to use dependable paints, even if they cost a little more per can than the ordinary kind.

B-H "ENGLISH" PAINT 70% Pure White Lead (Brandram's Genuine B.B.) 30% Pure White Zinc 100% Pure Paint

is guaranteed—every can of it—over the signature of the maker. There is also printed on it the basic formula which ensures permanence and "covering capacity." In spite of the rise in cost of materials, Brandram's B.B. White Lead and other similar quality ingredients are used in the same liberal quantities as in the very earliest days of B-H manufacture. B-H "English" Paint will never be allowed to deviate from its original standard of quality no matter how conditions may influence other manufacturers. There's too much at stake in the wonderful B-H reputation to risk its prestige by even a slight departure from the famous formula which gives it such "body" brilliance, durability and all-round satisfaction.
