FROM CANADA TO CALCUTTA

FROM SOO TO SAMARKAND...

Your bank is a link between the man in Canada who has goods and services to buy or sell, and his customers abroad.

The business of your bank is not all done in dollars and cents. It renders valuable service to Canadian business in the far-off market places of the world, overcoming the obstacles of strange currencies, be they pesos or piasters, escudos or rupees.

Through its commercial correspondents and business connections all over the globe, your bank often has the specialized information necessary to bring buyer and seller together, no matter how far apart they live.

Your bank is able to gather information on the reliability of foreign firms, to handle letters of credit, to arrange the complicated exchange of funds, performing an individual, intricate and inexpensive service to importers and exporters alike.

This feature of Canadian banking has a direct bearing on your welfare. It has, through many years, developed the sale of Canadian goods abroad, resulting in more jobs for Canadian men and women.

MEN FOR HOME BUILDING MUST BE SECURED

Home building is highly essential to overcome pressing housing shortages, and to provide dwellings for the Forces as discharged.

Shortages of workers for building homes and for producing the building materials are threatening to impede Canada's program for the construction of 50,000 homes as soon as possible.

All men experienced in home building or in producing building materials, who are not now working in either of these industries, are urged to apply to the nearest office of the National Employment Service immediately.

Men experienced at home building or producing supplies, if now in other essential work, will be given permits to work at jobs which will assist the house building program.

All men, not now at house building nor producing supplies, who can fill a job in this program, are urged to answer this call.

Apply at once at the nearest office of the National Employment Service.
