LINDSAY, FRIDAY, SEPT. 28, 1889. 3.000.

THE LINDSAY CENTRAL.

The arrangements for the "misny Contral have made excellent progress and everything is now in capital shape. The number of entries is considerably in excess of the Central here two years ago, and all the indications promise an exhibition that will rank among the best in the province. The directors are active and energetic men, and the worthy secretary is a host in him. The watch with delicate from is said to be welf and is determined to make the Lindsay one of the Globe's nickel-plated stem-Central a success. The Midland railway winders, but whether the Weekly Globe modation; and THE Post can guarantee that if any unforespon obstruction happens on the callway there will be a prompt transfer without any delay. We can invite all our friends and readers to visit Lindsay during the exhibition week, feeling confident that they will see a successful exhibition. But they should liest read thenumerous advestisements in THE Post this work, study the attractive bargains there offered by Lindsay merchants, and come in with well illed purses to make their purchases, Those who do not now take THE POST

### THE MEDIAND QUESTION.

seribe for it for the next year.

The present interests and future welfare of Lindsay are largely concerned in the time table and other arrangements of the Midland rallway; and it is well that our leading eltizons and business men should use all their influence and spare no exertion to see that the affangements are as favorable as possible. The managers of the ford have, of course, to consider their own interests and the wants and interests of the whole system; but there should and can be a harmonious and effective arrangement that will be fairly satisfactory all along the line and advantageous to this place. With that end in view we would again urge that the deputation to interview Mr. Cov regarding the time-table should at an early day arrange for a meeting. The coputation as appointed was of the Mayor, Mesers, John Dobson, John McLennan, J. D. Flavelle, High O'Leary, C. E. L. Portoons, and some others whose names do not occur to usut this moment. Mr. Cox was unable to meet them at the time appointed, and Intervening holidays broke up the committee for the time being. Perhaps not could be done, but the interchange of views would be beneficial. The deputation could ascertain whether Mr. Cox is a had man or a good man, from a Lindsay further reduction next month when the material point of view. No body will look after our interests if our leading business

We are informed by Mr. Cox that a new time table is under consideration and will go into force about the lifet of November. by which time the bridge at Lindsay and the Omemor link will be finished. It is proposed to run a through fast freight and beautiget thin-stopping for passengers only and doing no way treight business direct from Midland to Port Hope and return and from Port Hope to Midland and return in one day. This train will run on about the same time as the through trains passing landsay at 9 as me and 7 p. me and which were popular and convenient trains. These trains will not go via Wick or Mackwater; but by the direct some; and will make twenty miles an hour. This plan will, it carried out, secure a connec-Hon of great importance for Lindens, that is lost by the present time-table, to the erent loss and inconvenience of the public. The present morning express to and from Toronto to Port Hope will pass Lindens about the same time as at present, but will make the run via Peterboro. The train will leave Toronto in the evening after 5 instead of after 1 hand will have a Pullman car that will run through without change The Peterboro and Believille to Montreal. This train will carry the mails to the cast. The mails from the case will, it is expected, apply of the firmed dunction division about one in the afternoon. This is an outline of

some features of the proposed new arrange-ment that will make it more sutlefactory than the present time table. By it we and tietpate the people of the Niphering divinion, and from here to Ortilia, will be able to reach Lindony at convenient hours. A larger trade should now be done with Brock, so the people of that township case reach Lindsay with once. There are more details that cannot be discussed until it is seen by experience how the plan works.

With regard to the unfortunate detention of trains on Friday night week, referred to in THE Post last week, we are informed that the statement offered in extenuation of the blunders, vis., that the train despatcher had gone home for the night, was not correct. The train despatcher's office is open night and day. The detention was duly reported, but with the clause that the track would be open in half an hour or so, and this was the constant expectation. It was doomed to disappointment. It is quite safe to may that blunders of the kind will not occur again.

With regard to the new station at Lindsay it is stated that it will be found large enough for all purposes. There will be a wide and long platform; and so all the freight business will be done at the present linion station, the new building will give sufficient accommodation for passengers. That remains to be seen.

EDITORIAL NOTES.

Owing to the great rush of advertisements this week THE POST is made ten and sold; money to loan on mortgages or other pages-and still there is hardly room security. Office, four doors oust of the English enough. It pays to advertise in The Post.

> Some changes are expected to take place in the Ottawa government. It is stated that Hon. J. H. Pope is to take the department of railways and canals, and that Mr. Peter Wright is to enter the cabinet as minister of agriculture. Mr. Caron is credited with a desire to leave the war department and return to the safety of the bench.

Time is working a curious change in New Brunawick, Some years ago Sir Leon. and Tilley was all-powerful in his native province; but now Sir Hector Langevin has invaded his territory and rules in his stead. Sir Hector is the principal tory "boss" for the province; and he is a much more capable, resolute and daring manager than poor Sir Leonard.

We neglected to state that Mr. Samuel frwin passed the recent civil service examination at Toronto, and is now a step ahead for a Dominion government office. But since then Mr. Irwin has reformed; he has tried to shake off the "besotting influences of party politics;" though we fear he will have the shakes a long time before he suc-What will the next chapter re-

The local conservative admirers of Jim Stephens, the notorious Bothwell returning officer, who cheated Mr. Mills out of his seat, have presented him with a testimonial in the shape of a watch and an address, was thrown in free to "Jim" does not appear in the record. There are not many conservatives, we hope, who would wish to demonstrate their esteem for such a

The Port Hope Times offusively denies the statement in THE Post that an Orange gavel was used by Sir Hector Langevin at the laying of the cornerators in Port Hope, Our informant was a prominent Port Hoper who saw the whole proceedings and who knows whereof he speaks, The statement can be relied upon as accufate. We see no occasion for the Times to make a heated denial. The incident was should bring a dollar with them and subsimply amusing to onlookers. Sir Hertor will have to use an Orange gavel again and again if he wishes to attain the high object of his heart's ambition.

The tory Winnipeg Times copies with approval a graphic and wierd description of Bullalo lake in the North-west by the special correspondent of THE Post travelling in that part of the world. The correspondent pictures the appearance of pelicans in the gathering gloom, mapicionaly hugging the coves along the shore, with anxiety suspended on the ragged edge of uncertainty and doubt. The Times wondera why Tuk Post did not "aver they erre disgusted conservatives fleeing to Dakota," 'Ine Times at once recognized the close resemblance between some conservatives and pelicane; and if our contemporary will read the correspondence of THE Post this week he will see that the pelican in question was "Gum Swamp" Anderson, who is fleeing to the rockies, gorged with plunder. Did "Gum Swamp" give our cotemporary any "frozen whickey" a la Muschen."

An Ottawa special to the Hamilton Tribune says: "The outlook for the coming winter for the poorer classes is not at all bright. The Ottawa lumberman who have commenced to hire nands for the coming season's operations have opened a wages list with an average reduction of \$1 per month all round for bush hands. Wages run from \$15 to \$20, with a prospect of harvest is finished and farm hands begin to look for a winter's engagement. In the woods there will be a great reduction in operations on some parts of the Ottawa. For instance, J. R. Booth, it is said, will have no shantles on the Openogo, Madawaska, or Mississippi next winter, which means that there will be 300 men dispensed with there. The McLachlan Bros. will also contain the second of the contains the conta ctiffail their winter's work in the same district, owing to the fact that they have more than 100,000 logs left over on the Madawaska ready for next season's saw-

Two tavern-keepers at Bobcaygeon were some time ago on complaint of the village 2,000 MEN and BOYS WANTED. authorities fined \$20 each for an infraction of the license law, The Warder makes these facts the basis of a string of false charges against the Mowat government and Mr. Matthie, the local license inspector, in which much more damage is done to the queen's English than either of the parties attacked. The fines went into the village treasury, as the law provides, but the Warder, with strange imporance of this provision and with chara-wristle dieregard of the truth, alleges that Mr. Matthie has appled for the amount of fines on the ground that it was "the property of the Onturio government and that the municipality had no claim upon it." There is no ity had no claim upon it. There is no truth in this statement. Ananias lies. Mr. Matthie made no each application. Why did not Ananias ask Mr. Matthie before printing a lie about the matter? Because it is natural for Anguiss to lie, and so much easier than to tell the truth. It also gives an opportunity to attack the

The contest will be one of remarkable vigor. If the Musicoka practices are repeated -if and all that crowd take full swing the conelected. If there is a fair contact there is good reason to look for the return of Mr. Lyon, the liberal candidate. Shields, Nor-quay & Co., are determined to carry the day, by any means at their command.

When are we to have the rail way report from Mr. Samuel Irwin and Mr. John Mc-Sweyn? Is it to be done by the day or the piece, or at so much per page or column? Is it to be paid for at the rate of \$5.00 per column, or \$10.00 per half-column. The latter would be far cheaper. Mr. McSweyn should hurry up, or the Warder will charge him with blundering mismanagement and class stupididy as it did because of his fail-ure in handling the protest against Mr. Mc-

Mr. Roper, banker, of Bracebridge, who cashed a draft or cheque of \$1,000 for John Shields during the Muskoka campaign, has instituted a suit for libel against the Huntaville Forester for its comments on the extraordinary character of his testimony at the election trial. Mr. Roper actually had the impudence to frame an apology for the editor to publish in the Forester, but the editor promptly tells Mr. Roper to go ahead with his libel suit, and frankly tells him that if he and his confederates had "a due sense of the awkward position in which the revelations of the election court has placed them they would, instead of washing their dirty linen in public, go into the nearest cave and hide their diminished heads." When Mr. Roper went into the box he took an oath to tell the whole truth, but Judge Patterson in commenting on his evidence concerning the \$1,000 draft said the court "was not put in possession of the whole truth." By his proceedings for libel Mr. Roper will increase a notoriety that most men would not
