"... and someday, WE'LL take a trip!"

SOMEWHERE in the back of your mind, there's that urge to go places. Right now it must be filed under "Future" but it's part of us as Canadians to want to discover for ourselves what the rest of the world is like—to plan for that "some day," when *we'll* take a trip! That's why it must be part of our planning now, to make sure such pleasant things as trips are possible in the post-war world. And they'll be possible only if we *fight* against inflation—fight *now* to keep Canada's dollar worth a full dollar!

Why is *NOW* so important? Because NOW civilian goods are scarce, money is plentiful. *NOW* is the time we must guard against paying more than things are worth—against black markets—against buying more than we need, or goods we don't need! *NOW* is the time we must support rationing and price controls!

Up to the present, we've kept our dollar sound. And we can continue to do so if we keep up a strong, steady fight against inflation!

If we fail in this fight, prices will rise. Wages will never quite catch up. Soon you'll pay, perhaps a dollar for a quarter's worth of goods! And that means your dollar is worth only a quarter! That's inflation.

And after inflation, comes depression. Depression means neither you nor anyone else in Canada will have trips. You'll be lucky if you have a job! So, for our own sakes, for the sake of returned men, for our children, let's never relax our struggle to keep Canada's dollar worth a full dollar!

Make this Pledge Today!

I pledge myself to do my part in fighting inflation:

By **observing rationing** and avoiding black markets in any shape or form.

By **respecting price controls** and other anti-inflation measures, and refraining from careless and unnecessary buying. I will not buy two where one will do, nor will I buy a "new" where an "old" will do.

By **buying Victory Bonds and War Savings Stamps,** supporting taxation and abiding by all such measures which will lower the cost of living and help keep prices at a normal level.
