PRICEVILLE

Considerable rainfall on Saturday of last week and also Sunday and Monday.

A great many fields of oats are badly broken down by some of the late storms. The straw seems weak and easily broken.

A car of fuel supposed to be coal was being distributed in town the end of last week. We would be inclined to call it a mixture of slate and coal, and as slate does not make a good fire we will require a much larger supply to keep Jack Frost at bay during winter months.

Malcolm McLean and Angus Kennedy threshed their sweet clover on the town line lot last week.

Wm Mather and John McEachern finished gravelling from the Beaver creek south on the town line Artemesia and Glenelg last week.

D G McLean has been making some substantial improvements on his dwelling house, and McTaggart Bros are improving their cottage on the hill opposite the postoffice.

Mrs F McKinnon of town underwent an operation on July 30. Her daughter, an experienced nurse, is in attendance, and we are pleased to say that the patient is improving nicely.

Ronald and Mrs McCrae, who have been with friends here for a few weeks, intend returning to their home at Black Rock some day this week.

Mr and Mrs Fred Karstedt have received the second group of four little girls from the city to give them an outing and fresh air for two weeks. Such kindness done gratis to help so many of the poor little children of the city is truly commendable.

John Brown has added a balcony to his residence on Kincardine street.

EUGENIA

On Tuesday evening of last week a meeting was held in the pavilion when a financial statement was given of moneys received and paid out since the work started and of which a statement will be given later when details are completed. The work has been a success from start to finish and we feel a better choice could not have been made in the way of a memorial.

Dick Howard, son of Thomas Howard, had the misfortune to have his leg broken just above the ankle on Sunday last, while mounting his wheel on the way from Sunday school. He slipped in some way, and as the leg had just nicely healed after having received a break some seven weeks ago, the break this time proved to be almost a compound fracture. Dr Guy was called and soon had the lad fixed up, but it will be some two months before Dick will be able to be around again.

Well, even the Dews of the evening, or rather the wee sma' hours, are affecting the starting propensities of some of the Ford cars now, especially of the roadster class, and, do you know, it is very aggravating when the wires get wet and Lizzie won't start. Say, Laddie, either come home before the dew begins to fall, or else get in a hot shot battery to make the Lizzie get down to bizzy and don't be spoiling the villagers' pleasant dreams about daybreak i' the mornin'.

The Egg Question

Just a word concerning your eggs this season of the year, since during all this extreme heat the loss-off for rates has been incomparable to that of any one of the thirty six years I have been in business. This is all due to the farmer or producer holding his eggs too long.

Why not market your eggs every week while they are fresh and the merchants can pay you more money for them? The low price existing at present is due to poor quality and "held" eggs. They are not retained by the merchants or by the dealer. If the farmer would market his eggs every week there would be no "rots" as eggs will not go bad in one week if they get a fair chance and are kept in a cool, dry place. If they be marketed every week they pass right along and go into consumption in less than two weeks from time laid.

I have seen twenty eight dozen "rots" in one thirty six dozen case, and frequently ten to fifteen dozen. It is regrettable that a merchant should lose from fifteen to twenty dollars on a small shipment, all due to farmers holding their eggs too long.

One case has been returned from Toronto all rotten, sold to a merchant by one farmer. This is a gross injustice to the man who buys these eggs, since he has no way of telling how long they have been held. He simply has to take them in good faith.

In one or two sections the loss has been traced to the guilty party and they were punished to the extent of fifty and seventy five dollars under the Pure Food Act. The time is not far distant when every farmer and egg producer will have to stamp their eggs. In this way the loss can be traced to where it belongs.

Again I ask you to market your eggs every week, and unless you co-operate with us in this way it is impossible to avoid the loss-off.

Remember, eggs are a perishable product.

Yours truly
