In these days of light grain crops generally throughout the country it is refreshing to know that we here are not hit as badly as are some sections of the country. The following from an exchange seems to apply to most of old Ontario: The harvest is nearly over, the earliest for several years and the worst since the grasshopper year, 1896. Fall wheat and barley are average crops but oats are a failure. Owing to rust the late oats are a complete failure and the early are not much better than half a crop. Both the late and early potato crops are a failure. With the low price of cattle, prospects are not very bright for the farmers, and there is considerable complaining that when crops are poorest the taxes are highest owing to the Provincial County work that is being carried on.

In Orillia the Chatauqua was a decided failure and the guarantors have been asked to make up a deficit of $1098. There promises to be a legal battle to determine the guarantors' liability.
