The Only Remedy for Hunger is FOOD!

The most efficient way in which we can send increased bulk shipments of WHEAT, MEAT, CHEESE and EGGS to needy countries is through the Canadian government food Boards. These increased bulk shipments can only be made providing we reduce our own consumption. Here are five important ways by which we can make greater quantities of food available for export:

(1) BUY AND USE LESS BREAD, FLOUR AND OTHER WHEAT PRODUCTS, MEAT, CHEESE AND EGGS. SUBSTITUTE VEGETABLES, FRUIT AND FISH WHERE POSSIBLE.

(2) KEEP YOUR HOME STOCKS LOW — BUY ONLY ENOUGH FOR IMMEDIATE REQUIREMENTS.

(3) AVOID ALL WASTE.

(4) GROW A VICTORY GARDEN AGAIN THIS YEAR. PLANT MORE THIS TIME IF YOU CAN.

(5) DONATE ANY MEAT COUPONS YOU CAN SPARE. ENQUIRE AT YOUR LOCAL RATION BOARD.

Share with the hungry!

THE MIXING BOWL

BY Anne Allan HYDRO HOME ECONOMIST

If an engine does not spark you cannot coax it to go. Engines have to be fueled and repaired. If the human engine does not function, we can not carry on. Peaple have to eat. Yet there are millions of people in the world today who are without necessary fuel for their bodies. There are people throughout the world who resemble dilapidated machines — they look so gaunt, so sober, even weird. There are children whose expressions are vitiful, they do not smile or laugh. It's a horrible thought to realize that 20 million children in Europe are developing anaemia, tuberculosis and other diseases.

True, more food is likely to become available at harvest time, but that's a long, long time to go hungry.

Meanwhile, the emergency must be met. Action is required—voluntary action in our own homes and shops. The individual response will share their daily food requirements necessary for existence. Bulk shipments will go forward with efficiency and speed—compared to individual bundles and shop parcels.

To the question, "What can you and I do to help? The answer is: share and play fair.

1. Eat less of certain foods: wheat meat, edible fats and oils, eggs and cheese. We have an adequate supply of perishables to substitute for these foods wanted so badly in Europe today.

2. Prevent waste. Plan shopping carefully so that there will be no mouldy crusts or bone-hard cheese. Provide proper storage facilities.

3. Plant a vegetable garden. We should all be proud to see what Canadian soil can produce.

SAVINGS

Small savings add up. For instance, one slice of bread saved each day by each Canadian household would total 117,000 loaves of bread.

1. Serve milk and fruit desserts in place of those made of flour.

2. Make single pie crusts. Use fewer cake.

3. Put vegetable toppings on meat pies. Forget about dumplings and yorkshire puddings. Saute foods instead of dredging them with flour.

4. Freshen stale rolls and muffins by heating in top of double boiler or in a moistened paper bag in oven. Use what you have on hand before buying more.

5. Keep bread wrapped and in a ventilated box or covered crock. The refrigerator keeps bread fresh longer.

6. Use tested recipes, accurate measurements and careful cooking to avoid wasting precious ingredients. Don't cook for six when there are only four to be fed. If you have leftovers make them interesting and be sure they are used up.

7. Send unused meat ration coupons to Ration Liaison Officers. Use moderate cooking temperature to prevent shrinkage of meat. Cover cooked meats to keep pieces from drying out. A sharp carving knife means more servings.

8. Keep cheese wrapped tightly in a cloth moistened with vinegar and then rolled in wax paper. Cover table pieces or wedges with wax paper pressed with a warm pan. Cheese crumbs keep fresh in an air tight jar; transfer to smaller jar when quantity is reduced.

9. Keep eggs fresh by storing in cool dark place away from aromatic products. Store egg yolks in a glass of water and poach them for sandwich filling.

"Yes," he answered, "but I make the colors." —Think.

After the visiting couple had gone the mother explained to Betty that they were not married. "They're just engaged," the mother said. "They're planning to be married."

Betty thought the situation over a minnte. "I see," she said faintly. "You mean they're still in love."

As the evening wore on, five year old Gwen tucked her feet under her and nearly went to sleep in a cozy arm chair. Upon being discovered, she was straightened out and started off to bed.

"What's the matter with my foot?" she enquired as she hobbled to the stairs.

"Oh, I guess your foot's asleep," said Mother.

"That's funny," mused Gwen. "First time I ever went to sleep at the wrong end!"
