Gray Coach Lines

Additions to Rural Hydro Service

Your Commission desires to bring to the attention of Ontario farmers who have applied for Hydro service, a condition which is now seriously slowing up the building of rural extensions.

Essential materials and equipment are in extremely short supply, and the prospects of obtaining additional quantities in the immediate future are very meagre. Strikes in various basic industries and the extraordinary national demand are holding back the supply of all equipment needed.

While the Commission will exert every effort to obtain material and equipment for rural line construction, it can complete this year only a small part of the full program which it had planned. Consequently, many applications already approved will not, of necessity, be completed this year.

Your Commission will endeavour to serve all applicants in order of receipt of applications, giving preference to all farm and similarly essential applications over those for other types of service.

These facts are presented for your information, and with the expectation that they will enable you to bear more patiently with a situation beyond the control of your Commission.

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO
