Hello Homemakers! August and it's time to get rid of those prevalent pests! Flies and mosquitos in particular combine to make life miserable for not only those on holidays, but also for those who toil and sweat at home in the summer heat.

Some of the informative pamphlets issued by well-known manufacturers of insecticides point out the safe use of their products. The base of these new mixtures is a chemical with a long name we glibly call D.D.T.

There is a D.D.T. bomb on the market now, a petroleum mixture in a container, which if put in a closed room for 7 seconds will kill the insects immediately.

In powder form, the D.D.T. insecticide is very effective too. However, it takes time to act and is generally combined with pyrethrum or some other vehicle. This mixture should be put in cracks behind cupboards and places where the cat and other pets will not eat it.

The manufacturer of a paint insect killer recommends the product for 2 or 3 months. You spray it on surfaces or brush it on painted walls and screens.

These pest destroyers are not injurious to use. However, for the best effect do one room at a time. Cover any food, put the baby in another room, remove the house plants and the canary. Close the room for a minute after you've used the D.D.T. By the way, don't use the D.D.T. barn spray for the job in the house. It usually contains kerosene or an oil and may leave spots on fabrics.

Follow directions on the labels. Use an insecticide and you will enjoy more leisure hours having rid the house of pesky flies.

Do not encourage flies. Store food in closed containers in a cool place. Keep dishes washed after using. Keep doors closed and windows open and screened.

TAKE A TIP

1. Place stuffed peppers in a muffin tin while baking to keep them in shape.

2. Fresh peas stay green and will not shrink if a couple of lettuce leaves are put on top of them while cooking.

3. Meat loaf is cooked more quickly if you bake the mixture in a tube cake pan.

4. A piece of rayon thread is best for cutting angel food or sponge cake.

THE QUESTION BOX

Mrs. B. R. asks: Recipe for Meringue shells.

2 egg whites, ⅛ tsp. cream tartar, ½ cup sugar ½ tsp. vanilla, dash of salt.

Beat egg whites, cream of tartar and salt until frothy but not dry. Continue beating while sugar is being added, about 1 tsp. at a time. Beat until stiff. Fold in vanilla. Drop on baking sheet, covered with heavy ungreased paper, or press through pastry tube on to paper. Bake in 275 deg. electric oven 40-60 mins. Remove from paper at once. Makes 3 dozen small meringues. For colour variation: Before baking separate mixture into several parts and add different vegetable colourings.

Mrs. S. T. suggests:

Toasted Cheese Dreams

½ lb. sharp cheese, grated, 1½ tbsps. melted baking cream. 1 egg, beaten, 1½ tbsps. cream.

Combine the above ingredients and mix thoroughly. Remove crusts from one loaf of bread, and slice lengthwise. Spread slices with the mixture, and then roll and chill in electric refrigerator. When ready to serve, slice about ½" slices, place on rack and toast under broiler or if desired serve plain.

Cashew Cookies

3½ tbsps. shortening, ½ cup sugar, 1 egg, well beaten, 2 tbsps milk, Marashina cherries, 1 cup sifted flour, 2 tbsps. baking powder, ¼ tsp. salt, ½ cup cooking cashews (chopped).

Cream shortening, add sugar and cream until fluffy. Sift flour, salt and baking powder together. Add dry ingredients, milk and beaten egg. Add chopped nuts to dough. Drop from teaspoon onto greased baking sheet, top with slice of cherry and bake in 350 degree oven 15-20 mins. Makes three dozen.

Mrs. Murgatroyd (about to attend a political meeting): "I'm not prejudiced at all. I'm going with a perfectly open and unbiased mind to listen to what I'm convinced is a lot of rubbish.
