FIRST AND PARAMOUNT, ABSOLUTE SECURITY TO POLICYHOLDERS

'I have no one dependent upon me," you say.

Before many years there will be an old man dependent upon you. That will be yourself. Don't you think it worth while to provide for him ?

A few dollars saved each year now—when you can spare the money—and invested in an Imperial Endowment policy will furnish a regular monthly pension to support you in comfort and independence when you are old.

Write to-day—while you are in good health—for a copy of our booklet, "Penniless Old Men." To-morrow you may be uninsurable.

W. H. THURSTON EDITOR

WILL THEY CUT SALARY

Will our Dominion and Provincial Parliaments now reduce their salaries to a reasonable basis, since the cost of living and salaries generally have dismounted from their high horse? Over in New Zealand a 15 per cent. reduction in salaries has been made, and legislators over there drew only $2,000 previous to the reduction, while here they reward themselves to the tune of $4,000.

Miss McPhail has declared that she will only accept $2,500 for her services. It is a matter of principal with her and she intends to stand by her pronouncement regardless of whether the other members follow suit or not. Surely they will not allow a lone lady to pioneer the way to cheaper legislation without rallying around her as an escort.

One can scarcely expect anything of the kind from the Ontario Government, however, which last year voted themselves an honorarium over and above their salary, and which has gone ahead imposing taxation right and left in order to secure funds to carry on. Among the taxation which they have imposed, and which can be called nothing less than direct taxation, are amusement tax, higher taxes on motor vehicles, corporation tax and land transfer tax, license tax on game, etc., with a recent threat of a higher tax on gasoline. No, one could scarcely expect the Drury government to reduce their own salaries under these circumstances.

A BONE OF CONTENTION

Speaking before a gathering in Toronto last week the farmer member for Victoria got off a good one. He said that ' previously the farmer had been the backbone of the country before an election. After it he was the wishbone. Now, very often in the House, he was regarded as the funny bone."

IN MEMORIAM

Martin—In loving memory of our little twin daughter, Winnifred Renata, who fell asleep in Jesus March 23, 1921.

Yes, He has taken home Renata darling,
placed our bud among His flowers,
Taken back the jewel He gave us,
To a better world than ours.
One year has gone, my heart's still sore ;
As time goes on I miss her more.
Her memory is as dear today
As at the hour she passed away.
For the doctor was not there
Her little life to save,
But ever shall my thoughts linger
Round her lonely little grave.
Sadly missed by her mother,
—MRS. CHAS. MARTIN.

—D. McPhail, Auctioneer

Stomach Worm Loss Preventable.

Animal husbandry division men at the University of Minnesota Farm say that sheep owners of the state have suffered great losses among their flocks by reason of the stomach worm. The lambs suffer the most.

"The best preventive and the one most easily given," says Philip A. Anderson of the division, "is copper sulphate or blue stone, as it is often known. Make a 1 per cent. solution by dissolving one-quarter of a pound of the blue stone in a pint of boiling water, adding cold water to make three gallons, being sure that a clear solution is obtained and always using an earthenware or a wooden receptacle. The dose for lambs, according to size, is three-quarters of an ounce to one and one-half ounces; for older sheep, two and one-half ounces to three ounces. An ordinary tablespoon holds one-half ounce.

"A veterinarian's syringe can be used, but care must be exercised in not pushing the plunger of the syringe too rapidly, as the solution may enter the lungs and give trouble. This treatment should be repeated in ten days or two weeks, or, if the flock is badly infested, two or three times during seasons at intervals of 30 days."

THE MARKETS

Carefully Corrected Each Week

Barley	0 70 to 0 70
Peas	1 25 to 1 25

Preparedness

Have your car overhauled NOW—before the Spring rush begins—and you wish to go on that motor trip. You will want then to be sure that your car is in first-class mechanical order.

—engine	—brakes	—tires
—steering gear	—wheels	—wiring
—springs	—rear axle	—transmission

And it will be just then that our garage will be most congested and cars will have to wait their turn.

If in the case of the battery, as in that of the car itself, repairing and overhauling should be done only by those whose direct interest in and knowledge of its mechanism guarantees intelligent service.

The crank case should be drained out, and flushed with kerosene and a lighter body oil put in. The rear axle and transmission should also be drained and flushed and refilled to the prescribed capacity in each case with gear lubricant.

Acetylene Welding

Why throw away broken castings, etc., when we can weld them as good as ever? We specialize in this work and absolutely guarantee all our work. No job too small and none too large.
