Shinn-Flat

Lightning Rods
Prevent Lightning Losses

WHEN your buildings are protected with Shinn-Flat Lightning Rods, you may be absolutely sure that they're safe from lightning damage. Shinn-Flat Lightning Rods are the only kind made in the form of a flat cable.

Sir Oliver Lodge, Steinmetz and other scientists state that lightning travels on the surface of conductors, and hence the flat cable will carry the greater current, because it has nearly twice as much conducting surface as other forms. Actual tests prove that Shinn-Flat has less self-induction, less resistance, less heat and greater capacity than round cables.

Lightning Can't Strike if Shinn Gets There First!

Shinn-Flat prevents lightning by permitting the electricity to leak GRADUALLY from the heavily charged ground and building into the atmosphere above.

PROF. W. H. DAY

Professor of Physics at the Ontario Agricultural College for many years, and Canada's recognized authority on Lightning Protection, is now Manager of the Shinn Mfg. Co., and assists in training Shinn Dealers, thus insuring correct installation.

An independent newspaper published every Thursday at the office, Collingwood Street, Flesherton. Subscription price $1 50 per annum when paid in advance; $2.00 when not so paid. $2.00 to United States. Advertising rates on application. Circulation over 1100 weekly.

W. H. THURSTON EDITOR

THE INSIDE HISTORY

The "explanation" by the Deputy Minister of Game and Fisheries as published in the week before last issue of The Advance is very disappointing. We are told that the developments at Eugenia are to be made a fish sanctuary, but this much the public knew beforehand. We are told also that there are to be by products of pheasants, common and fancy, also deer and moose. But we are not let into the secret of how the Department came to be led into this expensive undertaking. There is a belief here that the Department is not sincere in its desire to benefit the province as a whole by raising fish, pheasants and deer, and these suspicions are based on a very good foundation. Until these are dismissed Hydro will have to share in the opprobrium of an irate people here.

A year after the hydro pond had come into being it was discovered the trout therein had grown to abnormal portions and fishermen from within a hundred miles radius had great sport capturing the speckled denizens. Then Hydro got busy and ordered everybody off, threatening prosecution for trespass, but as it was a public domain they found they had no machinery to enforce their dog-in-the-manger policy. Thereupon an appeal was made to the Government to take over the premises and make of it a government reserve. Hon. I. B. Lucas, who was member at the time, made a strong objection to such a high handed piece of business, but was overruled and the government supnely submitted to Beck's demand.

Their claim that the surrounding waters will be benefited by the overflow will never be substantiated, because all the streams within miles of the pond are already leased by private clubs, and the public is completely shut off from legal fishing. Therefore, those who enjoy a mess or two of trout during the summer are none too happy for having the little luxury removed.

We might also ask, what benefit the rest of the province will derive from the protection of migratory wild ducks? They leave here in the fall and stop for a short time at the private shooting preserves on Lake Erie, then pass on south for southern sportsmen. There is not much in this argument for sanctuary for ducks, deer and moose, and the fish part is as "fishy," as is the claim for benevelence on the part of the Department of Game and Fisheries

Mark Lear, manager of Shelburne Pictures, who had been in poor health since the first of the year, died at an early hour Thursday morning, April 20th. Interment took place at Thornbury. He leaves a widow. Deceased was a newspaper man before going into the moving pictures. He had experience on a daily newspaper in the States, and then ran the Thornbury Herald for a few years, disposing of that business to Hal B. Watson before coming to Shelburne early in the fall of 1920.—Shelburne Economist.

To Collect Tax From Total Bets

Toronto, May 1—Speculation is rife among racing enthusiasts as to the manner in which the new Provincial tax of five per cent. on all wagerings, announced by Hon. Peter Smith, is to be collected. It is understood the draft bill provides for the taking off of the amount from the total wagerings rather than from individual tickets, the five per cent. levy to be taken out probably at the same time that the jockey club's percentage is deducted.

The procedure to be followed has not been decided definitely, it is believed, and a good deal of the detail will likely be left to be worked out in the House after the bill is introduced.

Notice

Dr. McWilliam of Dundalk will make weekly professional visits to the Munshaw House, Eugenia, on Tuesdays and Fridays from 2 to 4 p m.

Keeping Celery.

At a constant temperature of 32 degrees Fahr., celery can be kept for several months, and placed on the market as fresh looking as the day it was cut. Recent experiments at the Ontario Government Cold Storage Station at Brighton, bear out this statement, which knowledge will prove of immense value to growers.

To obtain the best results from cold storage, celery should be well grown, partially bleached, cut with part roots on, with a little roughage left for protection; and finally, cut, hauled and placed in cold storage the same day.

BUSINESSCARDS

SOCIETIES

PRINCE ARTHUR LODGE, No. 333, A.F.& A.M, meets in the Masonic hall, Armstrong's Block Flesherton, every Friday on or before the full moon. Peter Muir. W. M R. G. Holland, Setretary.

Poor Old Folks—

Looks as if they'll have to go "over the hill to the Poor-house."

Their children either can't or won't support them.

Tragic? Yes! But not half so tragic as the old folks' remembrance of the fact that their present plight is due to their lack of foresight in not making provision for their declining years.

Be independent in YOUR old age.

A small amount invested annually for a few years in an Imperial Endowment Policy will enable you to end your days in comfortable independence instead of as a burden upon the charity of friends or in a paupers' home.

May we tell you about the income you can insure for yourself 20 years hence, by making small payments *now when you have the money?*

Don't wait—write for particulars to-day.

Bull For Sale

A pure bred Shorthorn Bull thirteen months old, recorded Mortgage Lifter—156270, male, color white, bred by F. J. Curry, Markdale, calved the property of W.J. Meads, Flesherton. He was sired by Matchless Duke, he by Gainsford Matchless, the highest priced Shorthorn Bull ever produced in Canada. He was sold to go to California for $10,000. Matchless Duke was sold here in our own county for $1,300. Mortgage Lifter is a good type of an animal in fair condition and has proved himself a sure stock getter. His dam, Roan Floria—117014—is of a good milking strain and runs back to (imp.) Apply to

FIRST IN ITS CLASS

The man who holds a high position in public esteem usually has earned it. So it is with automobiles.

You know the popularity of the Chevrolet car in this district and you know there must be a reason for it.

In fact there are many reasons. Here are some of them:

The Chevrolet is a car of high quality, remarkable performance, easy operation and control, excellent riding qualities and fine appearance. It is an economical car, too, in operation and upkeep.

If you would like to have a ride in the Chevrolet car we have been telling you about now and then, we would be glad to drive out to your place almost any day or evening and take you and your family for a little spin.

Our motto :—"Square Treatment." Ask any Chevrolet owner what he thinks of our treatment and service.
