He—"How long have you been engaged?"

She—"This time, or all together?"

ELECTRICITY

Maintains Employment . . .
Keeps Pay Envelopes Full

PLEASE DON'T WASTE IT!

Electric power is vital to Industry, and Ontario is experiencing an era of high production, unparalleled in its history. Contrary to expectations, the demand for electric power did not drop sharply following the war. More electric power is actually being used today for production of peacetime goods than was required at any time to forge weapons for Victory. This demand is constantly increasing and, during the next six months, Hydro facilities will be strained to the utmost.

New Hydro developments, planned to keep pace with Ontario's growth, were halted during the war years. They have since been hampered by shortages of men, materials and equipment. However many new stations to deliver electric power are being rushed to completion. Some are already in operation. But the need for saving electric power in your own home, during the Fall and Winter months, *is urgent* if the needs of Industry and Agriculture are to be fully served and employment maintained at peak levels.

Won't you please play your part? Remember—even *a little bit* of electricity, conserved by hundreds of thousands, *helps a lot.* It's *your* Hydro. Use it wisely so that Hydro facilities can more adequately meet the demands of all consumers.

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

Here are a few ways you can

Save

ELECTRICITY

Turn off all unnecessary lights. Don't forget about burning lights in empty rooms, halls, basement, attic, porch and garage. Eliminate all colored bulbs.

Keep lamps, reflectors and shades clean. Dusty fixtures waste as much as 25% of your light.

When kettle sings, turn off switch. Stored heat will bring it to a full boil. Keep kettle free from lime.

When cooking, use "High" heat for as little time as possible. Then turn to "Low" and use stored heat.

Use oven for cooking complete meals, rather than the cooking surface. Only one element is required for the oven process while three or four elements are needed for the cooking surface.

Use the correct size of cooking utensil on the proper size element.

When cooking vegetables, use a minimum amount of water.

Defrost refrigerator, regularly, when ¼ inch of frost has accumulated on the evaporator.

Where water is electrically heated, please use it sparingly. A drop a second from a leaking hot water tap can waste as much as 175 gallons a month.

Fill washing machine to water line only and keep lid on tub when washing. Do not overload.

Wherever possible, use the wringer at same time as clothes are being washed in the tub.

Please do not use portable electric heaters as they place a heavy strain on your Hydro System.

Your toaster, vacuum cleaner, electric iron or other electrical appliances should not be used any longer than required.

400,000 Left Feet

that never push a clutch!

GM HYDRA-MATIC DRIVE has been proved by nearly 400,000 Oldsmobile owners in billions of miles of "no-clutch, no-shift" driving!

400,000 Left Feet . . . left without a thing to do! Because Hydra-Matic Drive eliminates the clutch pedal and all clutch pushing. 400,000 right hands . . . on the steering wheel where they belong! Because Hydra-Matic Drive shifts gears *automatically.*

Oldsmobile first introduced this revolutionary advancement almost 8 years ago! And since then, nearly 400,000 owners of Hydra-Matic Oldsmobiles have found a new freedom in driving. These owners have driven literally billions of miles—without ever shifting, or pushing a clutch.

After these 8 years, Hydra-Matic Drive is still the only "drive" that eliminates the clutch pedal and shifts gears automatically through four forward speeds. The lowest-priced car to offer GM Hydra-Matic Drive* is the smart new Oldsmobile. It's ahead in performance—*automatically.* Ahead in appearance—*dramatically.* That's why people say—*emphatically* . . . "It's SMART to Own an Olds!"

The demand for Oldsmobile with the new GM Hydra-Matic Drive* is so widespread that it still greatly exceeds the supply. Make sure your present car carries you conveniently and safely through the waiting period by having it serviced regularly by your Oldsmobile dealer.
