SHOWER IDEAS

Hello Homemakers! Shower gifts can bring pleasure to all concerned when they bespeak special thoughtfulness. One way to select a gift which is "just what the bride wanted" is to choose from the commonplace necessities we use every day. You can add a surprise element to a clothespin bag by filling it with commercially prepared packages of quick cooking foods. A flower pot ceases to be just a flower pot when it dons an apron with garden necessaries (gloves, trowel, seeds, etc. stuck in the pockets). A pair of oven mits will hold a few companion items such as tongs, big fork and mixing spoons. Then too, bottles of spices becime a kitchen decoration when they are housed in a gaily coloured box or rack.

If the party is an informal one, the hostess may wish to decorate a place for the guest of honour. Try using some of the gifts. A clothes hamper for a bench and a clothes horse festooned with crepe paper as a trellis makes a good imitative rose arbor.

After the presentation of gifts the gathering of the clan may wish to play cards, enjoy a singsong, play records, make a bride's book or sew for the bride. This is the time for you to put the finising touches on the refreshments. A fruit salad or a jello vegetable salad and a cheese tray with accompaniments of rye crisp, biscuits, cheese sticks and melba toast with small cakes and coffee are favourites.

Remove from oven, press into dent to make it deeper, using spoon or other blunt utensil. Return to oven and continue baking for 15 minutes longer. Bring in Your Cream

As we are approaching the time of the year when cream is at the peak of production, so deliver that can of cream to the Flesherton Creamery and receive the extra cent for delivering. We guarantee to give you all that is in your can of cream.

Cull Your Hens Now

Since egg production is falling off, it would pay to cull the flock and market those hens which are not producing. We are paying the highest possible price for fowl.

The Creamery will be open Wednesday and Saturday nights.

The Parliament of Canada has just passed "an act respecting The Bell Telephone Company of Canada". Here is what this act means to the telephone-using public:

More and Better Telephone Service

A Period of Unequalled Growth

In the 34 months since V-J Day we have added 350,000 telephones—many more than in the preceding ten years. We now serve 1,360,000 telephones—22 for every 100 persons throughout Ontario and Quebec. We have never before provided so much new service in so short a time.

This unprecedented pace has been maintained with the aid of new capital from Canadian investors. More will be required.

The Continuing Demand for Service

Yet, despite this rapid growth, we still have 96,000 unfilled orders for telephones and another 69,000 requests to change party lines to individual service. Thousands of new orders are coming in every month.

Long Distance calls are three times pre-war levels.

Many new buildings, switchboards, lines and other equipment must be provided as rapidly as possible. The next decade may well see more telephone construction than during the preceding 68 years of our history.

Rural Telephone Service

Rural telephone service has expanded, and will continue to do so. In the territory we serve, 55 of every 100 rural homes and businesses have telephones. In 1945 only 39% had service.

Vast Construction Program Continues

Parliament has given the Bell Telephone Company permission to increase its authorized capital by $350,000,000.

The Company can now continue to go to investors for the money necessary to further the greatest expansion and improvement program in its history.

This construction program is necessary if the Company is to carry out its obligation and satisfy the public's continuing demand for more telephones and more telephone service.

. . .

Our objective is to extend and improve the service so that ultimately we can give every applicant the kind and quality of service he wants, when and as he wants it.

Our farm program calls for still more telephones, for fewer parties on each line, and for more new switchboards.

Dial Telephones

New dial equipment is being installed in tremendous quantities.

Today we have more dial telephones than the total of all our telephones in 1942. Now 70 out of every 100 telephones are dial. More exchanges will be converted to dial operation.

Financing the Program

Much of the new money necessary to extend the telephone system must be obtained from thousands of people who wish to invest their savings.

The principal means of securing this new capital will be by issuing additional shares of our stock from time to time with the approval of the Board of Transport Commissioners.

It was for this purpose that the authority of Parliament was obtained.

Best Service—Lowest Cost

The skill and enthusiasm of telephone workers will be devoted to turning the materials obtained with the new capital into service of the highest standard.

The public can be assured that The Bell Telephone Company of Canada will continue to provide the best telephone service at the lowest possible cost.
