Various remedies have been proposed. We think, however, there is none so efficient and simpless White Hellebore, a powder to be obtained at the druggists for about 30 cents per pound. Some persons may be aware of this being a specific for the eurrant worm, and yet not have any definite idea how to apply it. We will therefore give plain directions for its use, the results of our own practice.

Three large heaped tablespoonsful of powder to a patent pail of soft water, being about a spoonful to the gallon, will be found sufficient. Let this be well stirred occasionally for from twelve to twenty-four hours and left to settle; then pour off the and left to settle; then pour off the clear liquid into a watering pot with a fine nose; and so soon as the worms appear on the bushes, sprinkle them with the prepared liquid sufficiently to wat all the leaves. Evening is the best time to do this; and if you walk round and examine your trees on the following morning, you will have the satisfaction of finding the have the satisfaction of inding the pests all dead or dying underneath them. If you wish to prepare your liquid more quickly, you can expedite the process by pouring scalding water on the powder, as in makin tea. We do not waste the grounds are adjusted by the trut it in a best limited. or sediment, but put it in a bowl and lave it over some of the bushes with the hand. None need be afraid with the hand. None need be afraid of poison in the use of the above. Many substances, harmless to man are destructive to insects. Olive oil, for instance, though it may be used with impunity by man, is death to an insect. The rains and dews take any injurious influence away from the fruit; and there are few porsons who cook Gooseberries or persons who cook Gooseberries or Currents without first washing them. CELEBRATED PERFECTED SPECTACLES

IT is admitted that a well-fitting pair of Specjacles is one of the greatest blessings which modern science has conferred upon those needing optical aid; hence none but the most perfect should be used, as by that means frequent changes and the fatigue which the wearer of ordinary speciacles experiences is avoided. The least costly are those which are found to be the best.

Mr. T. Beall, Lindsay, claims to have for sale the Most Perfect Spectacles & Eye-Glasses in the World.

viz -the Celebrated Perfected Spectacles manufactured by LAZARUS. MORRIS & Co., combining in their structure the acme of transparency with the greatest accuracy of focus, and are mounted in the most durable and finest finished frames, in Gold, Silver, shell and steel. Every pair is fitted on optical rules, and thus the agent is also enabled to fit these famous Spectacles and Eye-Glasses by correspondence.

Every pair sold by the agent is warranted from one to five years.

There is nothing in the discoveries of science in late years that has made such progress as Photography. By comparing the Photographs taken some years ago with those made now it will be seen that the former were more caricatures than true pictures.—

The vulgar, chalky faces of the past are superseded by those of artistic shading, and pictures made only to fade by those of permanence and durability.

To enable persons of limited income t procure houses for themselves, this Association is prepared to advance money at low rates, over periods extending from three to fifteen years, upon the security of eligible building lots, to parties owning the same, or desirous of erecting buildings thereon. The instalments extending over the longer periods, would scarcely exceed the ordinary rental paid for similar houses, whilst the borrower would thus be enabled to acquire a free dwelling house for himself in perpetuity by paying little more than an ordinary zent.

Loans will also be made on the security of first-class city or farm property of every description on the same terms.

FARM PROPERTY. ances made on improved Farms at payable in yearly and half-yearly The advantages of this system too fully realized. The borrower is, by easy payments, enabled to pay the debt which would fall too heavy if it had to be paid in one sum at the end of a term of years, and with a little care can with ease provide for the instalments as they become due.
