DENTIST Nearly 23 years experience. ENGLISH BLACK RUBBER PLATES.

Mr. Gross is using for his best dental plates Gold, Platina and Black Rabber, three of the most reliable materials now in use for the purpose. Mr. Gross uses the purest English Black Rubber, and never, during his experience of nearly twenty-three years, has he been so uniformly successful with any material. Black Rubber is non-irritant and non-conducting, and cannot therefore produce congestion or any other disease of the mucous membrane of the mouth. Thousands of people who have been not only annoyed but actually tortured by the attempted use of red rubber and other poisonous plates are today wearing Black Rubber plates with pleasure, never before known in their experience with artificial teeth. An attempt is being made by a certain non-plussed dentist to force upon his patrons a humbug, called a "gold alloy plate." Do not be deceived by it. It is mothing new, but an old thing revived, and does not contain an atom of gold. Mr. Gross has a sample of the renume article from which gold alloy plates are made, and any one can see it by calling at his office. of gold. Mr. Gross has a sample of the renuine article from which gold alloy plates are made, and any one can see it by Galling at his office. He will make plates of what is called gold alloy or of red rubber for persons who want such plates after their poisonous nature has been fully explained. If you are about getting artificial teeth and want something that is good, and that will stand the test, get them made on Gold, Platina or Black Rubber, and you will have no cause for regret. In some respects the Black Rubber is superior to either of the meta's uamed and can be furnished at about one-fourth their price. A full upper or under set of teeth from \$9 to \$65. Mr. Gross is using Liquified Nitrous Oxide Gas, the purest, safest and most reliable form of gas in use. Electricity successfully used.
