CREAM

Cream production is good as we are approaching the time of year when cream production starts to go back. We advise you to start feeding the cows extra, as butterfat is going to be a good price during the fall and winter months.

EGGS

Eggs are now a good price, but declining in quality due to warm weather. Cutting down on the grazing period, more frequent colllection of eggs and rapid cooling of same is, in our opinion, the best solution for a better grade.

POULTRY

We are in the market for poultry at all times and can pay good market prices.

For your convenience the Creamery will be open Wednesday and Saturday evenings testtng cream unutil 10 o'clock.

HANDS AT WORK... for ONTARIO

ONTARIO'S products are desired and purchased by people all over the world and the capacity to produce such goods largely determines the economic welfare of every man, woman and child within her borders. Because the sale of every article produced in Ontario brings valuable dollars into this Province, we all are more assured of job security . . . and we and our children can have more of the better things in life. To produce such goods in sufficient quantities, skilled labour is vital. That is why every single one of us should be glad that war veterans are constantly being trained to provide the skilled hands so needed by Ontario industry. They receive ON THE JOB training under expert instructors in our Ontario factories.

This training, provided through the co-operation of the Department of Veterans' Affairs, the Federal Department of Labour and the Ontario Department of Education, starts veterans on the road to skilled craftsmanship. Taught to use their hands in such jobs as routing, etching, stripping, burnishing and finishing, they will eventually become photo engraving craftsmen. Because of the increasing importance of this trade, every effort of these newly-skilled workers helps to make Ontario a finer place in which to live and contributes to the welfare and happiness of all her citizens.

R. C. Smith, 22, of Toronto, an R.C.A.F. veteran, is shown routing a plate in a large Toronto photo engraving plant. During their training, veterans are shifted from one job to another to familiarize them with all phases of photo engraving. Many veterans subsequently obtain full time employment in the factories where they receive training.
