THE

ROYAL - CANADIAN

INSURANCE COMPANY

The London Mutual Canned Fruit for sale. Pure unfermented grape wine in stock.

FOR FARMERS.

The Royal Canadian offers the following advantages over the London Mutual; 1. If a building worth \$1200 is insured for

the the cash value no matter what the insurance may be.

6. When "ordinary contents" of out-buildings are incured by the Royal Canadian ALL implements are included. In the London Mutual only one resper and one mower are included no matter how good others may be.

7. When the outbuildings are not joined to each other the Royal Canadian insures under one sum the "ordinary contents" of all buildings not cut off by a distance greater than 40 ft, the same as if the contents were all under one roof. The Loudon Mutual requires a seperate sum on the contents of each building, if the distance is more than 12 it. This is a very important difference in many cases.

many cases.

8. In the Royal Canadian it is a part of the contract that standard STEAM THRESHERS may be used without a special permit and without any restriction as to the distance from stacks or buildings, caretakers, pails of water, kind of fuel or direction of the wind. Many of the policy holders in the London Mutual were obliged to run their own risk while threshing last season, because it was found to be impossible to comply with the conditions of their permit. When a farmer pays for it surance he should secure a policy which will hold him safe when it is most required.

9. The Royal Canadian is obliged to pay its losses within sixty days and usually takes much less. The London Mutual need not pay for ninety days and since it has become so hard up as to be obliged to borrow money largely it usually takes about the full time allowed.

10. The Royal Canadian policy is subject to the statutory conditions only. It has none of the numerous variations against the policy holder printed in red ink on the bank on the London Mutual policy.

II. As to security, the inspector of insurance, reports that the Royal Canadian has \$202,758, the amount he estimates to be necessary to enable the company to carry out all its engagements with its policy holders. Besides this he reports that it has to the good the \$400,000 capital paid in cash by the shareholders, and a net surplus \$117,607 making in all a total cash surplus of \$517,607 to protect its policy holders against unexpected contingencies. in addition to these cash items it has a subscribed capital of \$100,000 not called up. Regarding the security of the London Mutual the inspector reports that the amount of uncarned premium notes it should have on hand is \$200,300. To make up this amount in cash a second call would
