2,446 Green trucks and cars bring more and better Telephone Service

IN THE PAST twelve months these familiar green trucks and cars have travelled over 20 million miles to help provide you with good telephone service and to help in the big expansion and improvement program which is making service better and more useful all the time.

Constantly improving service means that today, few things give you so much real value at such low cost as your telephone.

Like everything else, cars and trucks have gone up in price, 30% in three years! Yet, up to now, despite higher costs on all sides, there has been no increase in the basic telephone rates established 22 years ago.

To-day's expansion program is breaking all records, but there are still orders we haven't been able to fill. We will keep right on working and building to make your telephone service a bigger bargain than ever — to continue to provide more and better service at the lowest possible cost.
