DEPT. OF AGRICULTURE

ALFALFA HAY IN DEMAND.

A letter has been received from the West Branch Co-operative Seed Growers' Association, Williamsport, Pa., asking for hay, as the crop in their district is very short. Alfalfa hay is preferred. Perhaps some of our Grey County farmers would like to get in touch with these people. We believe it would be good business to do so.

POULTRY CULLING

Next week poultry culling experts will be in the County. There is considerable work on hand. As the culler remains in the County for one week only the demonstration work which is free must be done during that time. Applications are being received up to the time of culling.

PLOWING MATCHES

Some time ago the Department of Agriculture, Markdale, sent to several agricultural societies a brief account of assistance which it was posibl to obtain for the developing of plowing matches in the County. Nothing has been heard at time of writing except from the Markdale Agricultural Society re the decision arrived at by the various organizations notified.

If plowing matches are going to be held this year, a start should be made in the preliminary work at the earliest opportunity so that when the season opens all will be in readiness. What Society will be the first to organize a plowing match?

CALCIUM ARSENATE

A new inseticide has come onto the Ontario markets known as Calcium Arsenate. Experiments have proven it is just as effective as Arsonate of Lead or Paris Green and much less expensive. It is claimed to adhere to the foliage much better than any other poison.

NEW MOTOR LEAGUE SIGNS

Last week new signs were erected on the main corner in town giving the exact mileage distances to the nearby towns. This work is done all over Ontario by the Ontario motor League and is for the service of all auto owners whether they are members of the Association or not, and is a creditable undertaking, but on a par with the work which has been done in the past. It is the Motor League which erected the sign-posts 100 feet from railway crossings, to warn motorists of the crossing danger. Still these signs are not heeded and hundreds of accidents occur yearly at level railway crosings, due, mainly, to negligence. If everybody would make sure that a train wasn't coming fewer fatalities would result.

DO WE DO IT?

The Municipal World passes on a bit of wisdom when it says "it is advisable and mandatory, under section 297 of the Municipal Act, for every municipality to adopt an annual budget and to levy taxes sufficient to cover the expenditures fixed by such budget. But it is more important to adhere to the principle of keeping the expenditures well within the limit of anticipatetd revenues. No expenditure should be contemplated before the money to pay for same is in some way secured. Every muincipality should be run on a cash basis and the running up of overbreach of trust on the part of the Government.

Wilkinson—Chard

In Dundalk on Wed., July 25, Susie, daughter of Mr. and Mrs. F. Chard, Toronto Line, South, to Mr. Albert Wilkinson, of Flesherton.

THE

Flesherton Advance

W. H. THURSTON, - Editor

A DELAYED OPPORTUNITY.

Through indifference, or oversight, or something worse, Flesherton is losing a golden opportunity by keeping Memorial Park closed to the motoring pubilc. We have heard of several motoring parties who recently desired to make use of the park and found it closed to them.

We understood that the park was to be thrown open to the motoring public as a resting place, and so announced last spring, but, from what has since transpired, we were evidently wide of the mark, as nothing has been done to attract or accommodate travellers in this little "gods acre."

Over in the United States nearly every town and village has its parking ground where free accommodation is given to motorists, including even free baths, hot water, cooking conveniences, etc., and these are taken advantage of by vast unmbers of travellers. Salaried caretakers look after many of these places, paid by the towns they serve. It is claimed by every such town that they are more than reimbursed by the amount of money put into circulation by motorists.

In our park are tables, kitchenette, and plenty of room to park cars and pitch tents, and this is a proper use for it in the summer time. The park should be thrown open and the Ontario Motor League advised that accommodation can be had at the park, day or night or both.

AT THE BALL GAMES

During the past few ball games played here, and elsewhere too, in the Centre Grey League, and other games we have noticed creepng into the "rooting" of the fans some expressions of personalities hurled at players which are not called for in the slightest degree. There is nothing like real good "rooting" at a ball game, but when people deliberately use these nasty words against the players who are doing their best we think it is about time to draw attention to the fact. Now, fans, let's have good, clean rooting at the remainder of our games, as the kind of talk we have referred to above does more to injure the game than anything we know of.

EDITORIAL NOTES

The Muskoka Free Hospital for Cosumptives has been enlarged by the addition of a large annex. We presume the free hospital will now be quite as free as ever—with its writs.

* * * *

The Delorme trial resulted in ten men of the jury favoring a verdict of "guilty" and two determinedly hanging out for an acquittal. There will therefore likely be a new trial We would suggest that a change of venu be made from Quebec to Ontario. No doubt a jury could be easily found here who would agree on a verdict.

* * * *

The big hold-up in Toronto will result in added precautions being taken for a time, such as a cordon of policemen lining the route taken by messenbers and in various other ways. Our suggestion is that a time bomb be located in every money bag with string attached to the firng pin so that it might be pulled when Mr. Highwayman grabs the bag. In that way he would not carry it far and the country would be saved the expense of a trial. The money might be destroyed, but one or two executions in this manner would act as a deterrant for the future.

FLSHERTON WILL BE WATCHED

An effort being put forth by the Muskoka hospital for consumptives to collect from the village of Flesherton charges against a patient whose place of residence Flesherton disputes, is worth careful watching by all municipalities. The case comes under the new act which does away with charity cases at hospitals and hospital and medical and surgical charges In Flesherton's case the patient had been away from the town for some time and in the decision on that very point all the municipalities are interested. If a man is roving around the country, staying awhile here and awhile there, one would naturally think his home to be where his parents reside. But whether the wise men who interpret the law think so in the case of hospital patients is yet to be discovered and that interesting document called a precedent is lacking to settle the matter. The decision in the action against Flesherton will decide it all.—Allliston Herald.

A young man named James Hopkins of Sunnidale was drowned at the Nottawasaga river a week ago Sunday.

Electric Railway News

One of the new promoters of the Huron Ontario Electric Railway was in town on Friday. This was Mr. Sawyer of Montreal. He started in at Fesherton to drive over the route, with the view of acquainting himself with the business possibilties of the district, and the probability of being able to secure water power. He was accompanied from Flesherton to Hanover by Mr. Gilbert McKechnie of Durham and as Mr. McKechnie is an enthusiastic advocate of the railway, it may be assumed that everything favorable to the proposal was duly pointed out. Anyway by the time Mr. Sawyer reached Walkerton, he had about made up his mind that the railway would be a good thing, that there was business enough in sight to make it pay and plenty of water privileges along the route to run it. He expressed himself as being delighted with the appearance of the country. Indeed, he had come up here expecting to encounter a semi-wilderness and was consequently not prepared for the revelation which awaited him. From Walkerton, Mr. Sawyer left for home, but will be back in a few days to make further investigations. If they decide to go on with the work they must sign the contract not later than the first of September.

Wicks Arrested

NIAGARA FALLS, Ont., July 26—Wm. Wicks, twenty-six years old of Mount Forest, Ont., was arrested at the Trennick hotel here today charged with steeling three thousand dollars from J. Schrieber, a farmer of Normanby township, near Mount Forest. It is alleged that Wicks promised to mary Schrieber's nineteen year old stepdaughter and induced her to steal the money from the house. He took the girl from her home to Arthur, Ont., on the pretext of marriage, where he deserted her and came to this city last Monday. He purchased a thousand dollar automobile here and was registered at the hotel as "H. F. Williamson." He was working for Schrieber at one time.

Wicks has been brought to Owen Sound jail, where his victim is incarcerated, and both will be tried there.

KILLED ON PROV. HIGHWAY

Clarence Massell, aged 23, son of Edward Massell, a farmer residing west of Formosa, died in the Bruce County Hospital, Walkerton, on Saturday morning from injuries sustained on Thursday, when he was struck by one of the big steel scrapers while working on the Provincial highway. The young man was unmarried and is survived by his parents, three brothers and two sisters.

Wm. Norman Randall of Arthur township, 18 years of age, was crushed to death when attempting to stop a runaway team, by falling fromethe wagon.

DORNOCH LADY IS BURNED TO DEATH

Mrs. Andrew Ireland, a lady 74 years of age, who resided in Bentinck Township, about one mile south of Dornoch, was fatally burned last week when her home took fire, and died the next day in a hospital. About nine o'clock Friday morning, the residence, owned by Mr. J. Crutchely, took fire from the chimney, and the two women, Mrs. Ireland and her daughter, endeavored to fight the flames. It was while attempting to save some of their household effects that Mrs. Ireland received her fatal burns. She had gone into the house and was overcome by the flames and badly burned about the head and body. The inhaling of the fire is thought, however, to have done her the most harm.

Canada Faces the Future With Confidence

CANADIANS have always been noted for courage, optimism and faith in their country.

Canada was not built up by pessimists, nor will Canada continue to develop if her people allow themselves to become croakers and grouchers. Canada is fundamentally an agricultural country. We have a soil and climate which can grow the world's finest agricultural products.

Canadian farmers who have earned the capital invested in their farms out of profits in farming are numbered in thousands. These successful farmers have paid off their mortgages, stocked their barns and stables, bought their machinery, made a good living and brought up their families. It meant hard work, but today they are independent.

We Must Cut Production Costs

Canada is meeting with the keenest competition in the marketing of her products. To hold her own and regain her place on the world's market, she must reduce cost of production.

The only way to do this is to increase production per acre, per cow or per other unit.

But improved quality, also, is essential to meet market demands.

The quantity and the quality of the products and the cost of production in competitive countries is beyond our control.

Prices of agricultural products are regulated by world supply and demand.

Hence, decreasing production will not help the Canadian farmer.

Money in Mixed Farming

In recent years, at different points on the prairies, oats fed to steers have brought from 70c to $1.07 as against the Fort William price of 42c per bushel, while barley used for the same purpose has brought as high as 99c as against the Fort William price of 57c per bushel. Farmers marketing their coarse grains in this way lower marketing cost, have a sure market and make money on their grain, while at the same time they market their roughage, otherwise often wasted.

The cattle embargo is now off. Steers are worth more money and certain to make good money for the Canadian farmer from now on.

Money in Pigs

The Dominion Experimental Farms have proved by actual test that there is a profit in feeding pigs. Last year at the Central Farm, Ottawa, after paying for feed, labor, interest and depreciation, the net profit per pig was still $4.63.

Profits from Sheep

As money-makers, sheep are hard to beat. In every Province from Prince Edward Island to British Columbia are found many flocks returning generous profits to their owners.

Poultry Pays

Poultry makes money for those who adopt modern methods, whether East or West. Little Prince Edward Island markets co-operatively in carlots, shipping annually upwards of one million dozen eggs. The British Columbia Co-operative Poultry Men's Exchange markets in the same way, thus saving ruinous glut in their local market.

There is a market for good Canadian horses, whether light or draught.

Grow Seed

Canada's Northern grown seed possesses extra vitality. There is a large market for it to the south. Canada exports seed potatoes, but imports other seeds. She has the opportunity to grow seeds for herself and for export.

The Future

Ten years from now the pessimists of today will have been forgotten. Britain has removed the embargo against our cattle. She wants our beef and bacon, our cheese, butter, eggs and apples, our wheat and flour. As the population of the United States increases, she will compete less and less against us on the British market. Eventually, she will herself be an importer of many other food stuffs besides wheat from this country.

Canada has the men, the climate, the land, the stock and the potential markets necessary for agricultural success. Let us farm with all the industry and science we can muster. Let's get to work and pay our debts. Canada is moving forward with confidence in its future. Let us keep going ahead.

Have Faith in Canada
