"We Liberals have dedicated ourselves to maintaining a high level of employment and income, because that means a high and widely distributed standard of living for our people."

Prime Minister Louis St. Laurent

You share— every Canadian shares— in the greater

Opportunity Prosperity Security

brought about by constructive Liberal policies

Liberals mean what they say. Look over the record of the last five years — the most impressive period of prosperity and growth in our history. It shows that Liberal performance exceeds Liberal promises.

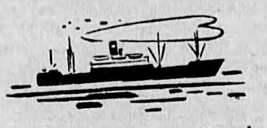
Under Liberal policies, Canadians can be confident that this forward march will continue — that Liberal promises will again be carried out.

More Jobs—More Income

More people are working than in any previous peacetime period—nearly a million more than in 1939. National income is *three times* as high as in 1939, is more widely distributed than ever before.

More Savings

People have nearly 2½ million *more* bank accounts than before the war. They have put aside more than 4 billion dollars in personal bank savings.



More Production and Trade

The products of our farms and forests, factories and mines and fisheries are worth twice as much as ten years ago. And Canada's exports are more than *four times* greater. Canada is the world's third largest trading nation.

More Family Allowances

The federal government has, since 1945, invested *one billion* dollars in Canada's children. Four million boys and girls in 1¾ million families are receiving a better start in life. Benefits are being extended this year.

More Old Age Pensions

Federal payments have been twice increased since 1945. The new pension basis is now increased to $40.00 a month, providing greater comfort and security for the aged and blind.

National Health

Health grants to provinces are helping to build a stronger nation. Many projects are already under way: nine province-wide health surveys; 13,000 additional hospital beds; training for health specialists; increased health services and research.

Aid to Home Builders

Close to 300,000 dwellings have been built since the war. More homes have been built in Canada, in proportion to population, than in any other country; and more were built last year than any time in our history.
