Cream

Since the time has come when second grade cream is being rejected, we would suggest that you deliver your cream two or three times a week and make sure of receiving top price.

We are now paying 2 cents above truck prices for delivered cream.

Cull Your Flock

This is the time to cull out the hens which are not laying, as there is a good market at present for old hens.

Starting on Wednesday, May 4th, the Creamery will be open until 10:00 p.m. for receiving cream and eggs, on Wednesday and Saturday nights until futrher notice.

NICK PECONI, OWNER

In the line of phrenology, a large lump above a man's ear indicates he's argumentative at home.

Some men marry to have someone to tell their troubles to, and soon have plenty to talk about.

You'll feel the EXTRA POWER *of the new*

FERGUSON TRACTOR

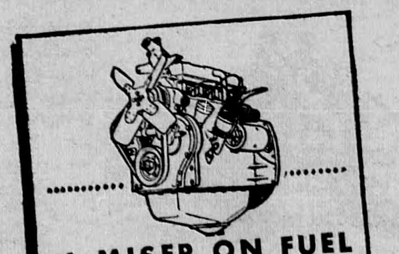
3 PLOW CAPACITY

How can a tractor so compact, so easily handled, put forth so much power for the heavy jobs? *Two* reasons! **FIRST**—is the Ferguson System of Linkage and Hydraulic Control. It takes advantage of natural forces in linking implement to tractor, making them *one* single "self-propelled" unit, and automatically increasing traction for the harder pulling. At the same time, the work of raising, lowering, carrying and controlling depth of the implement is done for you, hydraulically.

SECOND—This power, so fully utilized, is supplied by the "farm-type" overhead valve engine of Ferguson and Continental Motors design. Engineered and built for low operating cost, with longer hours of running on the many different *kinds* of work you'll find the New Ferguson can do.

Together, this combination gives you a farm machine with more than enough power, yet easily controlled, flexible for the wide range of farm requirements.

Whether you judge tractor performance by how *easy* it makes your work, the *time saved*, or by how much it lowers your *cost of production*, ask us to arrange your demonstration. You'll find the New Ferguson is the modern farm machine for *you*.



A MISER ON FUEL

Exceptionally high torque at low engine speeds often lets you use third gear when you'd expect to need second. Rugged, heavy-duty construction with drop-forged crankshaft; long-skirted, cam-ground aluminum alloy pistons; "wet" sleeves fully water-jacketed; full pressure lubrication and precision manufacture—an engine built to "take it"!

It's the FERGUSON SYSTEM that makes the difference!

AND FERGUSON SYSTEM IMPLEMENTS

in strictest

confidence...

THAT'S THE WAY you want your money matters handled. That's the way your bank handles them.

When you deposit money, cash a cheque, make a money transfer, arrange a loan, you want it done speedily, efficiently . . . and above all, confidentially.

It is only natural that your bank should work that way for you, for privacy is traditional in Canadian banking. In any case, the competition of other banks assures it.

Canada's ten chartered banks — competitive, efficient, private — provide for millions of customers a service unexcelled in the world.

State monopoly of banks would wipe out competition and would open your bank account to the eye of the state official.
