Prairie Bison Coming For Wilder's Lake Park

When Dr. Jamieson returned from the West last week, he brought with him the pleasing intelligence that he had been successful in persuading the government at Ottawa to ship him two buffalo calves for his Wilder's Lake park, and that they would arrive just as soon as the weather gets cool enough for shipment.

While Dr. Jamieson pays the express on these animals from the big national park at Wainwright, Alberta, it is a peculiar thing that he does not own the buffalo, but must return them again if the Government calls for them. This, however, is not likely to hapen. but it shows how strictly the Government guards its rights in prottecting the protected game under is guardianship.

A CAUSE TO COMPLAIN

Some of the culverts recently put in south of this village have been a horror to motorists, owing to the fact that nothing was done by the contractor to aid in getting around them to any extent. As a result, dozens of cars have had to be hauled out of the mud, springs have been broken and tires destroyed in an effort to pass them.

It seems strange that the Department of Highways will allow their contractors to cause traps of this nature for tourists and ordinary traffic. It is even thought that damage can be collected from someone for all the expense and trouble caused by neglect to make safe detours while small culverts are under construction.

For a distance of two and a half miles south of the village nine culvertshave been or are being built. and five of them within one and one quarter miles. A great deal of traffic passes over this road, and many are the anathemas poured upon the contractors for their negligence in failing to provide safe detours.

Car Burned At Maxwell

A car belonging to Mr. Wm. Irwin of Wareham, contractor on road construction near Maxwell. was somewhat badly burned on Saturday evening by the gasoline igniting. The tank was being filled after dark at the gasoline pump in front of Mr. S. Osborne's store in Maxwell and in trying to see the height of the gas a lantern was held over to give light. and the natural result of such carelessness was sure to be fire. The car was shoved out onto the road and sand and water were applied which soon had the blaze under control. However. the top and cushions were burned, along with the coil and switch. Repairs were made on Sunday and now Lizzie is running in her old time form.
