POWER REGULATIONS MUST BE ENFORCED

A reduction in power deliveries from one of the Commission's suppliers makes it necessary for all consumers to avoid wasting electricity. The Commission has advised the municipal systems that strict compliance with regulations respecting the use of electricity is essential.

Voluntary conservation is also needed. Homes, industries and farms can play their full part by reducing the use of electricity at all times, particularly during the hours of maximum use, from 10 to 12 in the morning and 4 to 6 in the afternoon.
