"SALADA" TEA

CHRONICLES OF GINGER FARM

by Gwendoline P Clarke

After hearng what the two-day windstorm did in other parts of Ontario I don't think we have much to complain about in this district. We had little more to put up with than a certain amount of inconvenience and unpleasantness. Friday night the power was off in town but ours was still on. But you can be quite sure we had candles ready—just in case.

Saturday morning . . . ah, that was a different story! The power went off, telephone went dead—and the kitchen stove smoked. Partner made one attempt to light the fire but the wind blew more smoke back into the room than it carried away. So we did without a fire. At that time the power was still on but we had a feeling it might give up the ghost at any time. With that possibility in mind I made coffee well ahead of time on the electric stove. Half an hour before breakfast—off went the power! Of course electric burners stay hot for a long time but even so the coffee would naturally be getting a little cooler all the time. "Well, what's a thermos for?" I said to myself. So I got out the thermos. Result—hot coffee for breakfast. We had boiled eggs too. I managed that by dropping the eggs into the cooling water and leaving until needed. On the whole it is rather fun, don't you think, just figuring out how to keep things on an even keel during an emergency? Of course we still have an oilstove which I could have used but I didn't fancy the job of standing out in the back porch fixing the oilstove—not with a 70 mile wind sifting in through the cracks and knot-holes.

During the forenoon the wind became stronger than ever—and colder—shifting a little towards the north. But that was better for the kitchen stove so we tried lighting the fire again—and this time we were not smoked out. That gave me a chance to get dinner. The hydro was still off and did not come on until 3:30—eight hours without it was quite a stretch. The telephone is still out although there have been linesmen working on it. The poles were blown down just below our place.

It was certainly an awful wind. We wondered if the doors on the barn and driving shed would stand the strain, even with extra bracing. But they did—and so, except for a few shingles ripped off the barn roof; some fences knocked around a bit; branches of trees strewn here and there, we really suffered very little damage from the storm at all. Need I say we are very thankful? I hope you people who read this column were equally fortunate. There is something very frightening about a high wind, isn't there? You feel so powerless against it, and, except for information given out by the weather bureau, you never know how bad it will be; how long it will last; nor who, or what, will be hurt before it is over.

Important plans are shaping up in the world today—of far greater importance than any freakish weather that comes our way—and yet how much more attention we give to the weather! It has even stolen the show from egg price discussions. Imagine that! One thing is certain—farmers may not be in the money these days, but they are certainly in the news. The outlook for farmers generally is not particularly cheering just now. But this much we can remember to our comfort. Since the depression days of the '30's we have come a long way. Better prices since that time have given farmers a chance to sort of catch up with themselves. Mortgages have been paid off; new machinery purchased; livestock built up and improved; tractors have taken the place of horses; modern conveniences have been installed in many farm homes; and farmers, on the whole, are working shorter hours. Altogether the farm family's standard of living has been raised considerably—isn't that as it should be? Farmers in Canada are not peasants, many of them come from well educated families with a cultural background dating back many generations. Men of this type farm because they love the soil; they like working with and improving their livestock; growing things and being close to Nature. But very few of them are satisfied with a low standard of living. Because of better prices things changed considerably during the last decade. If the present level can be maintained there is less danger of young people leaving the farm for jobs in the city. The average farm provides them with a better home, a better living—and plenty of entertainment, if they want to take advantage of it.

If another depression should come our way -don't take it for granted that it will—but if it does we are at least better equipped to meet it than we were in the '30's. The higher standard of living which we have attained in the interim might well be regarded as an addition to our working capital.

4702
SIZES
12—20

Anne Adams

New! Flyaway Silhouette in a dashing ensemble. Skirt has back pleats, bolero has new Mandarin collar, sharp cuffs. Blouse is easy; make several to change off!

Pattern 4702: sizes 12, 14, 16, 18, 20. Size 16 suit, 4⅝ yards 39-inch; blouse, 1⅝ yards.

This pattern easy to use, simple to sew, is tested to fit. Has complete illustrated instructions.

Send TWENTY-FIVE CENTS (25c) in coins (stamps cannot be accepted) for this pattern. Print plainly SIZE, NAME, ADDRESS, STYLE NUMBER.

Send order to Box 1, 123 Eighteenth St. New Toronto, Ont.

Long-Wearing Heel—On behalf of the feminine "villians" of the movies Andrea King presents movie meanie Dan Duryea with a gold-plated heel to symbolize his selection as the "Hollywood Heel of the Year." The award concerns his film roles only.

THE SUNDAY SCHOOL LESSON

By The Rev. R. Barclay Warren

The First Gentile Church
Acts 11: 19-26; 13: 1-3

Golden Text: And the disciples were called Christians first in Antioch. Acts 11:26

Persecution is often a blessing. The believers at Jerusalem were compelled to scatter, but they took with them the Good News of Jesus Christ. Some of them were natives of Cyprus and Cyrene and when they reached Antioch, they "spake unto the Greacians, preaching the Lord Jesus. And the hand of the Lord was with them: and a great number believed, and turned unto the Lord."

Barnabas, who had presented Saul to the Apostles, was despatched to Antioch. He is described as "a good man, and full of the Holy Ghost and of faith." The ministry of this type of man would bless any church. He secured the help of Saul and together they ministered to the first Gentile Church. Here the name "Christian" was first used. It was applied to those who had become the term is used very loosely. The followers of Jesus Christ. To-day dictionary defines a Christian as a "person showing character consistent with Christ's teaching, of genuine piety." If this were true of the approximately 98% of Canadians which the census calls Christians, how much better a country this would be.

A thriving church is not self-satisfied but has a missionary vision. This was the case at Antioch. "The Holy Ghost said, "Separate me Barnabas and Saul for the work whereunto I have called them." Here was a Divine call, realized by the individuals called and by the other leaders in the church. General McArthur has been calling for missionaries for Japan. The church is responding, but slowly. O that God would find many like Barnabas, filled with the Holy Ghost, who will leave comfort and ease, to carry the glorious Gospel to those who sit darkness.

Cripps' Quip

"Are profits immoral?" Sir Stafford Cripps was asked by a needling questioner at a press conference.

Always ready with a reply, the Socialist Chancellor of the Exchequer answered that profits are necessary in a capitalist economy—but that they have to be taxed.

"Thus," he added brighty, "we get the best of both worlds. The capitalist gets his profits, and I get the money."

ANNE HIRST
Your Family Counselor

"Dear Anne Hirst: Am I a deserter because I have left my husband and my children?

"My husband allowed me to take a trip. On it, I met a man with whom I fell deeply in love. I do not know whether he loves me, but he was wonderful. He has been married, but otherwise I don't know too much about him. I have not seen nor heard from him since.

"I wrote him a letter, which my husband found. My husband was very much upset.

"I have been married 13 years, and am 33. My husband is nearly 10 years older. I find I do not love him, and I'm sorry I married him. He has always been deeply in love with me; he is good to the children, and they love him. He has been faithful, he does not drink; but he is not too well, and is often irritable.

"Now I have left home. My husband says I am a deserter, and to leave the children, too, is a sure sign that I do not love them. . . . I don't know whether to turn to the other man or not.

UNDECIDED"

AN IMPULSIVE WOMAN

What can you be thinking of? But of course you are not thinking. To yield to a sudden infatuation (which must be purely physical) and desert your husband and little children, is a callow act unworthy of a wife and mother.

I am not unmindful of the emotional crisis that you face. A woman contented in her marriage meets a man who awakens a passion so overwhelming that she is shocked of her accustomed serenity, flung into a whirlwind of sentimental reactions that for years have lain dormant. Her husband becomes obnoxious to her, even her children appear only another obstruction to the consumation of her desires—

And obsessed by the tumult within her, flings them off and goes her own way.

But which way will you go?

If this man had been more than momentarily interested, he would not have been silent all this time—unless he is too honorable to pursue another man's wife. If you turn to him now, he will see you as a woman maddened by passion, too unstable to be trusted by any man. Could you bear that?

Go back home immediately, if your husband will have you. And find your consolation in being a loyal wife to a man who loves you, and a mother of whom your children can be proud.

Temptation comes to us all. But only the weak will yield. If you are wondering which way to turn, turn to Anne Hirst and let her guide you. Address her at Box 1, 123 Eighteenth St., ew Toronto, Ont

Chairman at church gathering "We welcome tonight the Rev. Mr Jones. This is the first chance he has had to speak since he married."

Cheating By High School Students Presents A Real Modern Problem

A high school graduate recently gave only 12 correct answers to 50 simple addition problems when she made application for a job in a downtown department store.

The personnel manager was puzzled. High school records showed that the girl's grades were above average and she was regarded as a good student.

Further questioning of the girl by the personnel manager brought out the answer. The girl admitted that she had "cheated" her way through high school.

Poll Reveals

Cheating in the classroom has long been a touchy problem in high schools. A poll of 10,000 high school students revealed that more than 50 per cent of the youths had cheatin one way or another in the classroom.

There have been many attempts to curb this problem and one of the most successful has been the project carried on by students and faculty at Fordson High School in suburban Dearborn.

Students in each of Fordson's 36 social science classes selected a delegate to represent them at a student congress especially set up to determine what could be done about cheating. The congress was split into small groups of five or six students. A general discussion of the cheating problem was carried on in each group.

The delegates then returned to their classrooms, where further discussion was held. After compiling suggestions from these discussions, the congress then set up a definite program to curb cheating.

The program was studied by the faculty and the final finishing touches added. It's this student cooperative job that has practically eliminated cheating from Fordson High. The problem has been brought out in the open, teachers explain, and the student now feels that by helping to set up a corrective program he is helping himself.

Delegates, in formulating their analysis of the problem, pointed out that there "is a great deal of cheating going on" and that "much of the cheating goes on unbeknown to the teachers." The students then listed various ways that Fordson youths were cheating.

Some of these were: Copying answers from another student on tests or written work. Hearing or telling or signalling answers to or from another student on tests or written work. Using notes or "ponies."

Giving other students higher grades than they should have had when papers are exchanged and corrected in class by students. Copy-other student's notes, homework or notebooks. Students in one class passing along answers or information about a test to students in another class who will be having the test later. Obtaining and using a copy of a test given by a teacher during a previous semester. Taking a copy of a test from a classroom before it is given. Changing marks in the teacher's gradebook when she is out of the room.

Danger Signals

Then the delegates listed the shortcomings of cheating. These included:

Cheating lowers a student's sense of honesty. Students don't learn as much when they cheat. Cheating develops attitudes and viewpoints which may cause the student trouble in later life. Cheating hurts both parents and taxpayers, as students don't get the full measure of what school has to offer. It is unfair to a student who doesn't cheat and gets low marks to see a student cheat and land on the honor roll.

The final recommendations of the congress, which the school has put in effect to eliminate cheating, include:

That more emphasis be placed on honor, and that the dishonesty of cheating be stressed.

That whenever a test is being given teachers should watch carefully to prevent cheating. This would not only catch cheaters but protect the student who doesn't want to cheat but who may be put on the spot by his classmates.

That the same test should never be given to several classes.

That papers should never be exchanged and corrected by students.

That no student should be allowed to record grades in a grade book.

That more theme type tests should be given.

Work other than tests should be assigned and heavily considered for the final mark in a course.

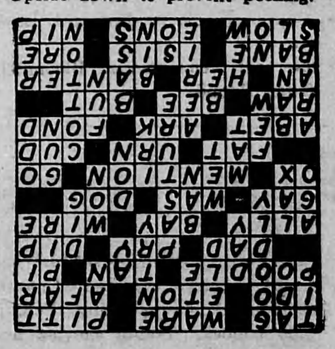
Blackout Art Shows

Picture galleries throughout the world may soon be provided with specially blacked-out rooms in which visitors can view exquisitely coloured pictures now being painted by an entirely new process in Holland. Artists are producing these pictures with novel pigments which resemble the powders used for lining the tubes of fluorescent lamps.

Viewed in ordinary light, the pictures look dull, flat and uninteresting. But when looked at by invisible ultra-violet light in a darkened room they take on a brilliancy of colour never equalled by the great painters of the past. By the new technique, contrasts of light and colour can be heightened at least a hundredfold.

Life-like effects have already been achieved through the use of the new paints.

Upside down to prevent peeking.



HOT ROLLS *double-quick!*
with wonderful new fast-acting DRY YEAST!

PARKER HOUSE ROLLS

Measure into large bowl, ½ cup lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 min., THEN stir well. Scald 1 c. milk and stir in 5 tbs. granulated sugar, 2½ tsps. salt; cool to lukewarm. Add to yeast mixture and stir in ½ c. lukewarm water. Beat in 3 c. once-sifted bread flour; beat well. Beat in 4 tbs. melted shortening. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough in bowl, grease top and let rise again until nearly doubled. Punch down dough and roll out to ½" thickness. Cut into rounds with 3" cutter; brush with melted butter or shortening. Crease rounds deeply with dull side of knife, a little to one side of centre; fold larger half over smaller half and press along fold. Place, touching each other, on greased pans. Grease tops. Cover and let rise until doubled in bulk. Bake in hot oven, 400°, about 15 minutes.

● No more spoiled cakes of old-style yeast! This new Fleischmann's DRY Yeast keeps fresh in your pantry! And it's *fast-acting*. One envelope equals one cake of fresh yeast in any recipe.

Get a month's supply!
