SEVENTH
of the series dealing with the establishment of the BANK OF MONTREAL at representative points in CANADA and elsewhere

IN VANCOUVER AND VICTORIA

THE completion in 1886 of the Canadian Pacific Railway, a project that had received the moral and financial support of the Bank of Montreal, cast a bright ray of promise across the then somewhat troubled economic life of Canada.

Canada at last was spanned by rail from coast to coast, opening up for profitable development the fertile territory lying between.

The Bank of Montreal signalized the completion of the line by establishing a Branch at Vancouver and later at Victoria, thus completing its transcontinental chain of Branches and bringing to the Pacific Coast banking facilities essential to the successful development of the great economic potentialities there.

Of its 567 Branches, 53 are situated in the Province of British Columbia.

BANK OF MONTREAL
Established over 100 years
Total Assets in excess of $650,000,000

What Dry Cleaning Is.

A thorough washing in pure gasoline in which has been dissolved benzine soap.

Benzine soap cuts or loosens the soil and dirt, while the gasoline washes it out of the fabrics. Unlike water washing, gasoline does not shrink the canvas or material.

Moved by Mr. Ramage, seconded by Mr. Hamilton, that this Association express its thanks to the City Council of Owen Sound for the use of the Council chamber for the meeting. —Carried.

Why It Is Cool

CHICAGO, June 17—Eminent meteorologists, explaining the freak weather, which is necessitating overcoats in the middle of June, causing an epidemic of tooth ailments and generally upsetting the ordinary schedule, say it is due to the fact that the sun is losing its "pep". The weather is also blamed for the recent disastrous tornadoes in various parts of the country. Prof. Henry J. Cox of the United Weather Bureau, says the sun is not giving off its customary amount of heat, because of the "smoke screens" or spots. These are in reality enormous swirling storms of gas and flame and cast up a haze which obscures the sun's rays and lowers radiation. He says these conditions come in cycles usually about 11 years apart.

PIONEER OF OSPREY PASSES TO REST

The grim reaper visited Feversham locality on Friday, June 13th at 6.30 p.m. and removed one of the old and esteemed settlers of the 12th line of Osprey, in the person of Mr. Wm. Hodgson, he having attained the ripe age of 80 years, 9 monnths, 13 days.

Although ailing for some time death came as a shock to his home and community. On Monday he contracted pneumonia and on Friday deceased had passed to the Great Beyond. We extend our deepest sympathy to the sorrowing family to whom, we know, death is a great loss. He leaves to mourn, his wife (Mary Pinch), who is critically ill; Mrs. A. Allison of Myrtle, Man.; Mrs. Robert Plummer, Ravenna, Ont., and Sarah and Charles at home. Mrs. Allison has been at home the last two months nursing her mother.

The funeral took place on Sunday, June 15th, the remains being placed in the Feversham cemetery, service being conducted by the Rev. Shannon of McIntyre.

Mr. Hodgson was born at Stouffville, where he spent the first twenty-one years of his life, when he came to the farm on which he has since lived, and which he converted from the forest, being one of the old and sturdy pioneers.

How to Control Root Maggots.

The cabbage maggot can be controlled by treatment, early in the season, with a solution of an ounce of corrosive sublimate in 10 gallons of water, applied to the stems and roots of each plant twice or three times at intervals of a week, using an ordinary watering can with the rose removed and the spout reduced to a convenient form to make the application. Onion maggots can be controlled by the use of a poisoned bait, consisting of one-quarter to one-half an ounce of sodium arsenate dissolved in a gallon of boiling water, with a pint of molasses added.

Crop rotation and diversification are sound forms of insurance for the farmer.

The United States Department of Agriculture has recently issued a leaflet on clean milk. The gist of the leaflet is expressed in its concluding sentence: "Keep milk clean, covered, cold."

Name your farm. A good name adds something to it; both on a home and on a place of business.
