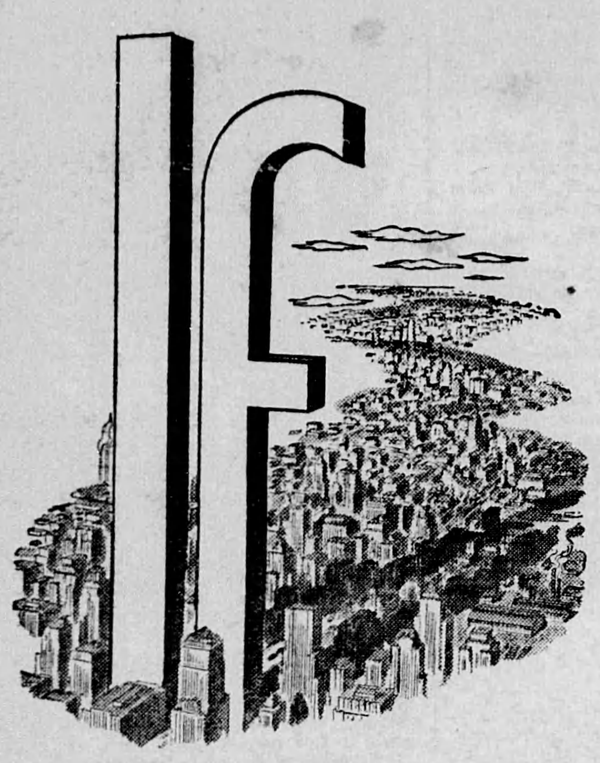
SAME GRANDMA — BUT TIMES HAVE CHANGED

It used to be that when Grandpa came in and unexpectedly announced extra hands for dinner, Grandma would exclaim, "Oh, for land sakes!" Why didn't you tell me sooner?" Then she'd throw a handful of cobs into the stove, run to the cellar, dash back, and presently set up a dinner fit for a king.

Now-a-days, if a farmer suddenly shows up with a couple of extra guests for dinner, his wife exclaims, "Creepin' jigggers! Why didn't you tell me?" Then she grabs a can opener, flips an electric switch on the stove, reaches into the deep-freezer, and presenly comes up with a dinner fit for a king.



If all the people who work for the telephone company,

And all the people who earn a living by making the things the telephone company needs,

And all the people who have their savings invested in the telephone company,

And all the people who depend on good telephone service to run their businesses and manage their homes;

If all these people, with their families, lived in one city,

This City-With-No-Name would be by far the largest in Canada, and one of the largest in the world.

Keeping pace with the growing needs of communities everywhere for more and better telephone service has taken lots of work and lots of money.

Only a financially healthy telephone company can carry on this big job.

Telephone users, employees, shareholders — everyone has a vital interest in a service that means so much to the welfare of so many people.

ONTARIO

ONTARIO MOTOR VEHICLE ACCIDENT TOLL RECORDED ALL-TIME HIGH IN 1949

URGENT APPEAL IS MADE FOR WHOLE-HEARTED PUBLIC AND PERSONAL CO-OPERATION TO CUT TRAFFIC LOSSES IN 1950

In deaths and injuries on Ontario streets and highways, 1949 proved to be the worst year in the history of the Province. Despite the fact that the intensive and maintained campaign for safety by the Department received generous support and co-operation of the press, the radio, the schools, the police, many service clubs, safety organizations, the operators and drivers of commercial vehicles and many thousands of citizens, the toll of tragedy reached an all-time high.

HERE IS THE 1949 RECORD

Motor vehicles registered in Ontario	969,368
Tourist vehicles recorded	4,500,000
Persons killed	830
Persons injured	17,469
Property damage	$9,531,659

THE PICTURE IN 1950

In 1950 there will be in operation on Ontario highways one million motor vehicles owned by Ontario residents. There will be more tourist vehicles in the Province than ever before. Traffic will be much heavier, and more chances of accidents will exist.

Estimated motor vehicles in 1950,	1,050,000
Estimated drivers licenses in 1950,	1,350,000
Estimated tourist vehicles in 1950,	5,000,000

Unless the Ontario public takes this problem of highway safety seriously to heart and everyone sets out to cut down this mounting scale of accidents, it is possible that in 1950 the death toll may reach a new shocking figure, with the number of persons injured keeping pace.

With these facts in view, it behooves every man and woman, young and old, to make it a personal objective to establish and maintain safety, and to preach it at all times to schools, families, drivers and acquaintances.

The Department of Highways is devoting all its energies to a continuous planned attack on accidents. The earnest teamwork of all citizens and organizations is requested.

It is a common cause that all of us can aid for the general good.

GEO. H. DOUCETT
Minister of Highways
