> From the Templar. (Continued from last week.) JUSTICE IS A WOMAN.

To digress for a moment. Why is it, think you, that justice, who must needs be the embodiment of wisdom and im partially, should be personfied by a wo-man, when the sex has never been considered of sufficient mental calibre to have an opinion worth counting, or hav-ing one is supposed to lack the nerve and independence to express it? This may well be one of the puzzlers to the feeble female mind. It should at least be a consolation to us that our chivalric defenders, who so strongly or jest to our flesh and blood selves in the legislative balls, are tolerant of our marble or pictured re-presentative. What if she is deaf and dumb and blind, one must not want the

earth!

But to return to the point from which we digressed. It was plain to these local workers that no one society could cope with the situation, and they deter mined to call in the aid of the provincial union. Therefore, we find the first provincial official utterances on the question of a law to protect mercantile employee was made at the annual convention of 1891. The then superintendent of hygiene and social purity was authorized to collect from all over the province facts bearing on the situation; and, in connection with the sub executive, to make an effort to procure from the government the required legislation. Hundreds of letters were ed legislation. Hundreds of letters were sent broadcast from Ottawa to Windsor, and line a great drag-net, gathered in the pitiful and often shocking details that were needed; scores of religious societies were appealed to and promised assistance; many members of parliament were interviewed in person or by letter; the news-papers were pressed into service as a means of creating public sentiment; and by the time the house opened in the spring which the cultivation of chierry was of 1892 everything was ripe for action. As a result of the consideration given

as under revision, his eye fell on this by the government to the representations tem, "What's chicory?" he asked. No of the official delegation that waited on the knew, no one had ever seen it growng. It had never been raised or manu-actured in the United S:ates. The factories."

The desired from the inspection of both mercantile houses and factortories by women became apparent; but lest a double issue might jeopardize the success of the original undertaking it was decided to ask original undertaking it was decided to ask original under taking it was decided but for one thing at the time.

Dear eisters, it is a mockery for us to sigh, or groap, or pray, after the hallot, if we do not also work for it; and if we truly believe that its possession would hasten the overthrow of wrong and the reign of righteonsness, are we not under obligation to do our utmost to secure it?

We shall look for some helpful sugges tions for this winter's campaign from our provincial superintendent. In the American methodist church the

controversy over the ecclesiastical en franchisement of women is at its height, with a bright prospect of success. Eng lieb methodiste are just girding on the armor for the fray that must terminate in a self-governed, or, as of old, a man-governed church. Canadian church members are thus far quiescent on the subject.

A FORMER RESIDENT THOUGHT TO BE DYING OF BRIGHTS DISEASE - CURED BY DODD'S KIDNEY PILLS

LISTOWEL, (Special) Nov. 25—A despatch reaching nere relating to the recovery in Neepawa, Man., of Mrs. T. H. McKee formerly living here was a surprise to her friends and acquaintances. It was met by doubt, however, until confirmed by a reply from Neepawa. Her case was well known here as his lady was treated by several of the local doctors for Bright's disease and her friends thought, as did physicians, that her case was hopeless, and it was as a last resort that she left here to try climatic change. That Mrs. McKee was cured by Dodd's Kidney Pills in a few weeks, speaks volumes in their favor'-

The "Bloated" Manufacturer.

Discussing the liberal outery against the manufacturers the Canadian Trade Review says: "The rage some party writers show against 'bloated' manufac writers show against 'bloated' manufacturers seems to suggest that in order to prevent athletes becoming strong they would like to see the whole population stricken with small pox. To stop a few getting rich they wish all the people to be kept paupers. Men are as economically diverse as the breeds of cattle. Turn a number of animals into a rich pasture and some will feater while others remain and some will fatten while others remain lean kine, the difference is in the nature of the beast.' So, some men will get rich under the same fiscal and trade conditions which add nothing to the possessions of others. But turn the best TORONTO & MONTREAL LINE. feeders into a barren field, none will be fattened; in like manner, if trade conditions are bad, if foreign competition is disastrous, no fortunes will be made, nor will any workers have a comfortable subsistence. Although not 'bloated' ourselves, we teel no indignation at those who have piled up fortunes, as the pasture they have fattened in is an open one. Those, then, who are anxious to prevent any man making a fortune by trade must first establish such conditions as will render poverty universal, and prevent men of skill and enterprise reaping the reward of these qualities."
