Our serial story, "A Woman's Vengeance" by Bertha M. Many will join in our pleasure at recording the recovery of Mr. J. R. McNeillie, assistant county clerk and treasurer, who has recently passed through a very serious illness. There are few men in the county more popular than Mr. McNeillie and his return to good health will be a source of congratulation on all sides.

Since Christmas ten big retail stores in New York have failed, unable to carry over to the new year. These concerns carried heavy stocks, two of them being equal to \$250,000 each. But they didn't advertise in the newspapers The big stores which did advertise in the newspapers took the whole holiday business.

The Department of Agriculture has issued returns which show among other things the statistics of live stock in Ontario for the past five years. It appears that with the exception of horses and sheep the number of live stock in the province was greater on July 1st, 1898, than in any of the praving four years. There were on the above date in Outario 611.-241 horses, 2,210,943 cattle, 1,677,014 sheep, 1,642,787 hogs and 9,084,273 poultry.

Pigs may be made useful in more ways than

one. Recently an Australian coasting steamer struck on a reef and those on board were likely to come to grief. There being no rocklikely to come to grief. There being no rocklets on the ship, the captain tied a life line to some pige which formed part of the cargo, and had all the animals put overboard. The pige swam to the shore taking the lines with them, and by establishing communication every soul on board was rescued by means of travelling cages.

To find lady adepts at the roaring game of curling is a novel sight. In Peterboro the ladies are taking the game up and it is probable that a ladies' club will materialize before long. Montreal and Toronto ladies are also becoming interested in the specific party of the second of t becoming interested in the sport. In Lindsay, the home of champion curiers, the ladies do not curi (i.e. at the rink); they find it a much more congenial and more profitable past-time in fulfilling all the duties of good house

but progressive up to date business men. One of the first acts they do should be to wake up of the first acts they do should be to wake up the fire department. No one seems desirous of shouldering the mis administration in that institution, and perhaps no one is to blame. The council should therefore make new rules and appoint some one, making him responsible that they are enforced. It is ridiculous that no regular practices are held by the firemen. There has been too much dilly dallying in the belonde.

Mr. O. W. Routley of Sylvester's implement works suffered a serious injury on Friday. He was engaged in operating the shaping knives in the wood-working shop, when his right hand slipped in frost of the blades and before he could extract it his hand was badly injured. Hts physician, Dr. Clarke, found it necessary to amputate his thumb and foreinger.

The dire results attending the descent of man are probably more realized now by Mr. Wm. Irvine than they were a week ago. On Friday atternoon about 5 o'clock white making some purchases in Boxail's store he walked into an open trap doorway, and quicker than it takes to record it was lying unconscious at the bottom of the cellar. He was removed to his residence at corner of Kent and Adelaide streets, where it was found that beyond a severe shaking up he had received no serious

injuries.

"Au Enemy to the King" was presented to a large audience at the Academy of Music on Monday night by John Griffi h and a company of over twenty members. "Au Enemy to the King" is a remantic drama with the scene laid in the province of Barri, France, about the year 1385. It is a Hugenot tale, around which cluster stirring deeds of valor and heroism with the prettiest love scenes introduced. John Griffith made a splendid looking Ernanton De Lauvay, the Hugenot captain. Those who have seen the character taken by Sotheran cannot help thinking, however, that Mr. Griffith does too much roaring and shouting, overshadowing the nuer parts of his acting. Kathryn Purnell sustained well the difficult part of Julie De Varion despite the almost constant work she had to go through during the entire evening. The other members of the company gave good support. All this, with the beautiful stage settings, and the pretty affects gained by the softened colored lights thrown on the stage, pronounced "An Enemy to the King" the best play that has been here this year.

Poor, helpless, hopeless, sick, suffering, miserable woman. Sick because she doesn't know any better. Sick because she doesn't really know why. Sick because the organs that make her a woman are not properly performing their functions and so are sending nerve mestages with aches and pains and distress all over her quivering body.

functions and so are sending nerve messages with aches and pains and distress all over her quivering body.

Nine-tenths of women's sickness comes from disorder of these special organs. The symptoms are various—the cause the same.

Headache, backache, nervousness, wakefulness, neuralgia and fifty other troubles of women may nearly always be traced directly to feminine weakness or disease. When the most important organism of a woman's body is disordered her whole physical and mental system is upset. The only way to find comfort is to cure the real cause of the misery. Local doctors in gangeral practice are frequently so hurried and mushed that they treat the symptom and mushed that they treat the symptom and so the disease. They give a woman medicine for headache when the headache is due to the reflex action of the utering nerves. They may give her good medicine but for the wrong disease. Thousands of women, after years of discouragement, have written to Dr. R. V. Pierce, of Buffale, N. Y., and now thank him for their renewed health and happiness. For over thirty years Dr. Pierce has been chief consulting physician at the Invalids' Hotel and Surgical Institute. It was over thirty years ago that he began to use his "Favorite Prescription" in his practice.

It is a medicine devised to cure one eertain kind of diseases—female diseases. It brings ease and comfort and sleep. It restores perfect health. It fills out cheek hollows, brightens the eyes, puts vim and snap into the whole body. It is sold by most dealers in medicine. Don't take anything else is "as good." Get what you ask for. Patronize honest dealers.

There is a prevalent idea that at the end of the present year we shall commence a new century. That is obviously an incorrect opinion. As an exchange says, if a man owes you a hundred dollars and comes to pay you, when he has counted out ninety-nine dollars into your hand you would not tell him to stop. You would want another. In the same way the next century will not commence until the year 1900 has closed. We are two years distant from the close of the century, so govern yourselves and make your arrangements

Mr. Mackenz'e, President of the Toronto Street Railway Company, announces that his company is preparing to construct a system of electric railways out into the farming districts. There is no doubt that we shall see in the near future electric railways constructed through the country on a large scale. Some day inthe country on a large scale. Some day inthe country on a large scale. Some day in-stead of "hitching up" to drive into town farmers will jump into the electric car with their market commodities, make a quick journey in and after dispusing of the contents of their baskets and doing their buying return home in time to sit down to a late dinner. We may yet see the Lindsay, Bobcaygeon and Poutypool electric line and the rest of the county with eldelines connecting all the

Speculation is rife now as to what the new county council will do in regard to the House of Betuge. It seems to us there should be no of Betuge. It seems to us there should be no hesitancy in the matter. There was a majority in favor of the House of Refuge. small, it is true, but had there been anything like organization among those who advocated it, so that every part of the county could have been made familiar with the requirements of such an institution, there would have been a larger, much larger, oute polled for it. It has been the experience of other and older counties that a House of Refuge is almost indispensable in order to meet the various contingencies over which no one seems to have any particular jurisdiction. These places, in other counties, have been made partially and in many cases wholly, self supporting. Why not so in Viotoria county? By blocking or defeating the scheme the council will be acting in a manner detrimental to the very best interests of the county.

This Month's Business!

We have planned big things for this month and we expect big results. Stocks whose goodness outshines the past, and prices so low as to half repudiate the goodness Liberal methods, plenty of daylight, never so much to do, but never so prompt in doing These are the reasons for larger business.

We're simply reaching towards perfection in business methods-not expecting to arrive at the goal by chance, but by doing proper things in the proper way, at the proper time. There's a good deal in winning public confidence and the good-will of shoppers; one great principle of this store is to keep perfect faith with the people. In consequence it isn't necessary to use bold type in order to emphasize facts.
