KEEP UP THE COUNTY ROADS

During the past few years the Grey County council has made enormous expenditures for the improvement of the county roads in this County and were assisted in the undertaking by the Ontario Department of Highways. The result was very commendable a fine road being built from the boundry between Artemesia and Osprey to a few miles the other side of Priceville and to be continued to Durham. It has taken several years for this road to be built with the limited amount of money at the disposal of the county and the result has been that the road finished first is now in bad shape and needs repairing. The road from Flesherton to Priceville is very bad, full of holes and ruts which make travelling very difficult. A traveller told us the other day that after travelling over a large number of main roads in Ontario this year the worst spot was between Flesherton and Priceville. Now that we have our good roads why does the Road Committee of the County Council allow them to deteriorate the way they are doing and in a short time have to go all over them again. We hate to see our good money go to waste on roads when proper care of these roads is not given them. A program of upkeep of roads under the care of the County Council should be undertaken at the June meeting of the Council.

EDITORIAL NOTES

For the month of April the total number of accidents reported on Canadian railways is 156, involving the death of 13 people. There were nine crossing accidents in which three persons were killed and eight injured. Autos were involved in five of the nine crossing accidents, resulting in two persons being killed and five injured. Six of the nine crossings were classified as unprotected.
