LORNEVILLE. Special to The Warder

THE farmers in this vicinity have all about OUR cheese factory opened for the season on Tuesday. A larger quantity of milk is expected than that of last year.

PERSONAL,-Mr. Jas. Butler of the Mansion house, Lindsay, spent Sunday here with his mother.....Mr. John Williams of Lindsay, spent Sunday among Lorneville friends, STRAYED .- On Wednesday night of last week, a large boy, answering to the name of Tom, strayed about a mile north of this village and on his return home reports having a very curious experience by meeting a number of white caps and also by wire walking. Remember children are not allowed on the street after eight o'clock.

Frogs to Be Farmed.

The United States Fish Commission just now is investigating the subject of frog farming. It is believed that there ought to be money in the business, considering the large demand for the hind legs at high prices. The principal market for them is in New York city, where they are gathered from all parts of the country, Fulton market alone selling from 75,000 to 100,-000 pounds annually. The frog crop at present is wholly

wild, and the bulk of it is marketed in New York. Missouri is the greatest frog-producing State; the town of Madrid is second with 25,000 pounds. farm is exceedingly simple and cheap.

She stands and walks with the erect carriage and the little jerky trip of a young woman, she sits with her skirts sweeping the floor beside her, her feet together or easily crossed, instead of flouncing down on her back breadths and folding her hands over a wide lap. Altogether she is a replica of her daughter.—Boston Herald.

The largest work on one subject is the "Acta Sanctorum," or "Deeds of the Saints," most commonly called "Lives of the Saints." It was begun by the Bollandists, a community of the Society of Jesus. The first volume was completed in 1643, and sixty-one volumes have altogether been issued. Other, volumes are still in preparation.

Trolley to the Pyramids. One of the results of the British ocof modern inventions and conveniences in that ancient land. The "tramways" in Cairo are run by electricity, and a concession has just been granted for a trolley line from Cairo to the Pyramids. NEW USE FOR A WATCH.

Compass From a Pocket Timepiece.

watches are aware of the fact that they are always provided with a compass, with which, when the sun is sining, they can determine a north and south line, says a writer in The Baltimore American. All one has to do is to point the hour hand to the sun, and the south is exactly half way between the 'our and the figure "12." Few of the many persons who carry Kennett alone ships 60,000 pounds of tween the pur and the figure "12," dressed frog legs annually, and New on the watch. For example, suppose it is 9 o'clock in the morning. Follow The experts of the Fish Commission the rule given above, and we find the say that the plant required for a frog south, as is indicated below. Prolong this line along the face of the watch, Shallow ponds may be found almost and you have a north and south line, anywhere, and they need no prepara. and from this any point of the comtion, unless the planting of bushes pass may be determined. This around the edges.

Frogs feed mainly on insects; the reason that they bite at a bit of red fiannel is because they mistake it for a gaudy bug. It is a good idea to build a low board fence around the pond in order to keep out snakes and small mammals that are fond of frogs.

The force should be close to the wat. OBITUARY.—It is our sad duty to chronicle the death of Mr Jas Wright, who departed this life at the early age of 35 years, on Friday, April 30th. About a year ago Mr. Wright had an attack of hemorrhage of the lungs and despite the best medical attendance he gradually sank away. The body was interred in the presbyterian cometery on May 2nd, and the funeral cortege was one of the largest witnessed in our village for many years.
