THE ELECTION IS ON

The Federal parliamentary fight is now on with the last lap of the race to come off on the 29th of October. Mr. King's announcement to this effect was made public on Saturday last and his announcement was very disappointing to many, and his forecasts for future legislation very unsatisfactory. For instance he promised Senate reform, but in practically the same breath he appointed two new Senators. Perhaps he merely meant that so far as in his power he would make the Senate reform merely a play on words.

In this county the campaign has not yet been crystalized. The Conservatives of North Grey have nominated their old standard bearer, Mr. M. Duncan, but the reform party have not yet announced their candidate. In South Grey only the Conservative, Dr. Campbell of Markdale, has as yet been announced. On Monday next the Progressive party will nominate their candidate, who, undoubtedly, will be Miss Macphail, who appears to be as popular as ever among the Progressives. And that is the way things stand this week.

EDITORIAL NOTES

The Ontario Government proposes to license all auto drivers in Ontario next year.

* * *

A bearded lady at the Canadian National Exhibition has three marriages to her credit. That's nothing! Some women with money have six or eight, and still not satisfied.

* * *

The Georgian Bay apple crop is, to all appearances, going to be a bumper one this year. There is no better quality of apples than those grown in the Georgian ay district and the demand cannot be satisfied.

* * *

Weekly papers in Meaford and Thornbury are vigorously protesting on the condition of the road between Thornbury and Owen Sound, claiming the road to be in a bad condition. Don't talk secession on account of that.

* * *

O.T.A. opponents are out hot for stronger beer and more of it. It will be just by small steps like these that attempts will be made to bring back the free use of whiskey at any time. The people have already spoken, but to deaf ears.

* * *

Under the provision of the Ontario Mothers' Allowance Act, 4,184 mothers throughout the Province, with 12,786 dependent children in their care, received during July the sum of $149,898. The number of children in each home ranges from two to eleven. Of the beneficiaries, 3,393 are widows, 522 are wives of incapacitated husbands, 159 are deserted wives for a period of five years and upwards, and 110 are foster-mothers to orphans.

* * *

Mr. King has charged Mr. Meighen with helping to prevent immigration to this country by his declaration that there is trade depression in Canada. Mr. Meighen charges that Mr. King's trade policy is responsible for the great migration from Canada to the United States. Probably both are correct to a certain degree. But the fact that immigration is discouraged is no crime against Mr. Meighen. The United States has limited it for several years and Canada is not enthusiastic over the welcoming of large bodies of immigrants, many of whom have proven a burden rather than a help.

* * *

Dunn's reports of crop conditions in Ontario, Quebec and the North West give hope for the resurrection of general business. The pooling system in vogue amongst Western grain growers impedes for a time the flow of money into the hands of farmers, but merchants are of the opinion that the extended distribution of monies will be more satisfactory as a support to general business throughout the year. The estimated crop is now placed at approximately 375,000,000 bushels as against 262,000,000 bushels in 1924. If these figures are reliable it would mean that farmers in that district would have from this source alone about $145,000,000 greater return than they did last year.

MAXWELL

Miss Alice Long has returned home from Brantford where she has spent the last eight months. Mrs. Will Long, her aunt, accompanied her home and remained for a few days' visit.

The trustees of S. S. No. 9, have purchased a fine new bell for the school here. It is a long time since Maxwell has heard its school bell ring. It certainly will be a pleasure to hear it, as it has a very clear tone.

The rain on Sunday will put a damper on the harvesting for a while. The rain was needed though.

Quite a number from here are taking in the Exhibition this week.

Mr. Bremner has moved his family to Singhampton from here.

Mrs. Chas. Heron had eight of her brothers, sisters and nieces of Buffalo motored over and spent the week end with them. Mr. Chas. Heron and daughter, Margaret, returning with them for a short visit and will attend the Exhibition.

BORN — On Thursday, September 3rd, 1925, to Mr. and Mrs. Robert John Morrison, a son.

Our teacher, Miss Maynard, Mrs. Spofford and daughter, Miss Tolly, accompanied by Harold Spofford, spent the week end at the Ex.

A COMMUNITY PROPOSITION

Mr. E. Roy Sayles, former manager of the Canadian Weekly Newspapers' Association, and therefore thoroughly acquainted with the weekly newspaper situation in Canada, says editorially in the columns of his newly-acquired paper, the Renfrew Mercury:

"Everywhere there is a growing understanding among business men that the newspaper, while an individual business problem of some publisher, is, at the same time, a community proposition—a community asset. The newspaper serves the community more than it serves the man who publishes it. The time is coming when everywhere business men will feel a personal interest in the newpapers' welfare. The fact is, a community cannot make progress without it. It can exist, but it cannot grow.

With this realization, there has also come an understanding that one newspaper serves better than two or three. It has become a simple problem of business mathematics to centre the strength of a community behind the newspaper that has made itself, through work and service, the strongest journalistic factor in community development.

So far as Canadian newspapers are concerned, there have gone out of business since 1914 fifty daily newspapers, while 224 weekly newspapers have suspended publication or ebaebsnobrbbb Y,sp.vsWf.l..ov been absorbed by the other paper in the town. In some counties of Ontario, from four to eight weeklies have suspended publication.

The announcement of newspaper consolidations will continue. The result will be better and more outstanding weekly papers with improved service to advertisers, subscribers and the community in general.

COUNTY CONSTABLE FAWCETT BADLY INJURED BY FALL

County Constable Hartley Fawcett met with a serious and somewhat alarming accident on Saturday a.m. He was engaged in threshing operations at the farm of Mr. V. E. Hewgill, on the 10th Conucesion of Collingwood township, when he fell through a trap door in the floor of the barn. It appears that the machinery had been stopped in order to grind the cutting box knives, and the engineer was waiting for Mr. Fawcett to give the order to start up again. As no such order came the engineer went to investigate the cause and Mr. Fawcett was seen lying unconscious in the feed room just under the trap door. In his fall he had struck his head and had also sustained some broken ribs. He remained unconscious for the greater part of Saturday but was able to be removed to his home at Clarksburg in the evening. He is progressing as well as can be expected.—Clarksburg News.

PRICEVILLE

Mr. Harry Watson of Ottawa is a holiday visitor at W. G. Watson's.

Miss Leone McDonald of Toronto visited over the week end and holiday with her parents, Mr. and Mrs. A. McDonald.

Mr. and Mrs. Drimmie and children of Yoevil and Mr. and Mrs. Ed. Watson and children of Durham and Miss Louise Watson of Beaton spent Sunday at W. G. Watson's.

Mrs. Thos. Chase of Toronto is visiting at Mr. Peter Muir's.

Miss Phoebe Livingston and Miss Dellia McPhail of Toronto visited over the week end with friends here.

Miss Lizzie Campbell of Montreal is holidaying at her home on the North Line.

Messrs. Jack Shortreed, Earle McLeod, Allie McInnes and Jack McMeekin and Ray McLean are taking in the Exhibition.

Miss Margaret Stothart is visiting her brother, Mr. J. Stothart, and sister, Miss Minnie.

Mrs. H. McEachnie and children are visiting friends in Bentinck at present.

Mr. J. H. McLean came up from the city on Saturday, where he has been engaged in the carpentering work, during the past few months.

Miss Mary Carson, who has spent the holiday with her parents, Mr. and Mrs. A. Carson, returned to her duties in Toronto.

WHITE ROBINS AT OWEN SOUND

Three strangely market robins are reported to have been seen on Friday by Mrs. MacKellar, 1154, 2nd avenue east, in the vicinity of her home. One of them had a white head with two white feathers in the tail, another had a white head only, while the third was distinguished with just two white feathers in the tail. Their unusual appearance attracted attention, and they looked very pretty.—O. S. Sun-Times.

LIME WILL AID CLOVER

It Enables the Plant to Cope With the Winter

Acid Phosphate Good for Clover and Alfalfa—A Great Root Farmer—Nitrate of Soda Helps In Cold Springs—Poultry Pointers.

(Contributed by Ontario Department of Agriculture, Toronto.)

Did your clover kill out in the spring? If it did, you had better write the Department of Chemistry, Ontario Agricultural College, Guelph, for directions for taking a sample of your soil to discover the reason.

Reports from some districts this year show a good deal of winter wheat and clover killed out, states the Department of Chemistry, O.A.C. This is highly undesirable, and can be prevented by the use of lime and acid phosphate applied with the crop on which the clover is seeded. In some cases lime is not necessary, for the soil is not acid; but where acidity occurs lime is very essential. Phosphorus is a great root farmer, and it is the strong deep-rooted clover and wheat plant that withstands the alternate freezing and thawing of spring weather.

Result of Lime Phosphate Experiments.

In answer to a circular sent out last spring to the twenty-five co-operative experimenters handling our Lime Phosphate Experiment, the majority report that the clover on the half acre which received crushed limestone and acid phosphate in the fall of 1922 is in perfect shape, while in many cases the untreated sections did not winter nearly as well and in one or two cases will have to be ploughed up.

If seeding is done with spring grain it is good business to use acid phosphate at the rate of at least 300 pounds per acre, and preferably 400. If the soil is acid, lime is also necessary to give a strongly-rooted clover and alfalfa which will carry it over the first winter, the most critical period of the life of the plant.

Nitrate of Soda Helps In Cold Springs.

In such a season as the spring of last year, cold and wet, the greatest need of the plant is for nitrates, says the Department of Chemistry, Ontario Agricultural College, Guelph. The ground will be so cold and wet that it takes a long time to warm up, and as a result bacterial activity is at a low ebb. As a result no nitrates are formed in the soil, and plants cannot make vegetative growth.

To correct this and enable the plant to get away to a good start, apply nitrate of soda one hundred pounds to one hundred and fifty pounds per acre at once. If bought in lots of several hundred pounds it can be obtained at a reasonable price, and its benefit is almost certain. Do not, however, apply if heavy rain threatens, as it is soluble and will be lost by washing.

Another benefit which will be derived is this that the nitrate of soda dissolves in the soil water and soaks down into the soil. The roots go after it, and hence the result is a deeper rooted plant more able to withstand the period of drouth which so often follows a wet seed time.

Haying and Harvesting Supplies

Draw Rope Sling Rope Trip Rope Forks
Plymouth Binder Twine Scythes Snaths
Machine Oil Motor Oil Cup Grease
Massey-Harris Co. repairs.
