Character and Individualiay in Banks

In the course of development of a banking business, policies are formed, habits maintained, and methods practiced, which are peculiarly and intimately connected with the institution that gave them birth. It is these things that give a bank individual character that influences a man in making his financial affiliations. In offering our services, we solicit your enquiries regarding Standard aBnk policies as affecting your own business.

Trustees' Assoc. Hold Profitable Discussion

The public meeting held in the town hall on Saturday afternoon for the purpose of discussing the township school board bill, and other educational matters was well attended, and many questions of interest were brought forward and discussed by those interested.

Mr. R. J. Woods, ex-M. P. for Dufferin, and Mr. Farquhar Oliver were the principal speakers. Mr. Woods, in a very capable address, stressed the deteriorating effect which centralization had, and would continue to have if brought to bear on school life. The child he said was better in the sectional school, where he would be benefited by the home influences, and the increased interest in his welfare. While the present school system is in vogue, trustees act voluntarily, and without renumeration, while the ten men who look after the consolidated machinery would have to be paid without the interest which trustees have always had in their own school. Under consolidation, the section loses control of the teacher. A section having built a new school would be doubly taxed, in order to meet the debentures issued and also to inagurate and maintain the new school. He stated that when these conditions existed in a school section, he was absolutely opposed to consolidation.

Mr. Farquhar Oliver gave a splendid address on educational reform, and pleaded for all to consider ways and means by which the educational system would tend to keep the boys and girls on the farm, instead of adding impetus to the tendency which exists, of the youthful rural population drifting to the towns and cities. Mr. Oliver stated that traditionalism was a hindrance to the anticipated changes, and asked for Denmark's reformation to be emulated in part by us Canadian people in our educational system. Political differences should not be allowed to crop up and prevent good school legislation. At the conclusion, each speaker was extended a hearty vote of thanks for their splendid efforts.

Some good questions were asked and replied to by many who were interested and the meeting was what was intended, a profitable discussion only.

Mr. A. F. Pedlar acted as chairman and at the conclusion, the meeting ended with, "God Save the King."

Visitor From the Yukon

From Keno, Yukon, to Flesherton is a long distance but it was bridged this week when Mr. John Fawcett was a visitor with his sister, Mrs. H. Down. He had been to Ottawa to attend the session of parliament and from there went to Thornbury where he was joined by his brother, Irwin, who also was a visitor in town. The latter has not been in Ontario for 36 years and first went to Brandon, Man., 45 years ago as a young man, and for the past twenty-five years he has been a resident of the Yukon. We were pleased to receive a visit from him on Monday and many are the exciting experiences which he has had in that far north territory. He has made good in that famous gold country and at present has fourteen claims which are being exploited.
