Large Tree Cut in Osprey on Farm of A. Morrison

All of the best trees have not yet been cut in Osprey township as evidenced by the above picture of two of the six elm logs which were taken from one tree in the bush belonging to Mr. Angus Morrison, half a mile west of Maxwell. The trunk of the tree where the cut was made was seven and one half feet in diameter and took one whole day to cut. Six logs were cut from the tree, one ten feet the largest in the picture, and five twelve feet, the former measuring one thousand board feet on account of its roughness. They were delivered to the Durham Furniture Co. at Rock Mills and will be sawn at their mill there. Mr. Morrison received the even one hundred dollars for the tree, which was a good price, the price being paid for the logs being $30.00 per thousand feet. While limbing the tree a bee's hive was found in one of the limbs and about one hundred and five pounds of fine honey was extracted, which added materially to the value of the tree. Mr. Morrison's bush is about fifteen acres in extent and, needless to say, the huge tree was the largest there.

Just now Osprey is again noted for the fine large cedar poles which are being brought out from the Twelfth and Fourteenth lines by Mr. W. A. Armstrong of Flesherton, most of them being in the swamp purchased from William Henry on the Fourteenth. Mr. Armstrong had had men in the swamp there for the past four months cutting some of the finest poles that have come into Flesherton for years. Quite a number of teams are employed each day to take the poles to the yard at Ceylon where they are stored until wanted. They average from forty to fifty feet in length, while a number reach as high as fifty-five feet, and are real straight.

In the past Osprey has turned out some fine logs and poles, but we doubt if anything finer has ever been seen than the above specimens.
