(Intended for last week)

Here we find ourselves drifting along into the month of March with our mother earth covered with more snow than it has been all season, but we are not feeling blue as we are looking forward toward an early spring

A brave sleighload of young people had a thrilling, as well as a chilling experience one night last week. In spite of the cold and blustering winds that threatened they started off to attend a party at the home of Mr. and Mrs. Bert Hollingshead. All went well until after the ball was over; when the lads found their road completely filled in and had to trip the fantastic toe back home to a different tune, not some of the way but all of it—the lassies sometimes joining in. However the most of them got back before breakfast was quite over; and they speak of taking the snowplough along next time.

The problem of the son and daughter who go out every night isn't much more distressing than the same kind of furnace.
