Doubling the Arguments for Saving

ALL that can be said in the favor of opening a savings account in the Standard Bank may be repeated with greater emphasis as regards a joint savings account. Joint accounts are primarily for covenience of depositors, but where two people are bound together by common interests, the moral, as well as the practical value of working together, planning their financial betterment with the aid of a joint bank account is clearly evident. The Standard Bank solicits your joint savings account.

BANKING FIFTY YEARS

THE STANDARD BANK OF CANADA

FLESHERTON BRANCH—C. T. Batty, *Manager*

Mr. and Mrs. McMillan intend moving into Ceylon and will occupy the house the purchased some time ao from R. K. Gibson.

A Kimberley Ewe Has Unique Record

Mr. Elmer Ellis of Kimberley is the proud possessor of a Registered Oxford Down ewe, who believes in doing her duty in the reproduction of her kind.

In February of 1925 she gave birth to two ewe lambs, and this year brought three fine youngsters into the sheep fold. Her two lambs of last year have given birth to five lambs between them, and so the grandmother of these five woolies has the credit of being the dam of ten children, five daughters,and five grandchildren in the space of one year. By the time next year rolls around, her descendants should be a clan in the purebred world. All honour to their worthy ancestor.

Debates This Week

The debating series of the Grey Presbytery gets under way on Thursday night of this week, when Chalmer's and Kimberley hook up at Vandeleur on the subjet, "Resolved, that the Church, rather than the State, should be Responsible for the Moral Welfare of the Immigrant. Both leagues have entered into the fight with grim determination and a fine battle should result, with Kimberley upholding the affirmative.

On Friday night, St. John's team and Dundalk, meet at Inistioge on the same subject as the first mentioned teams, with Flesherton supporting the affirmative. An interesting competition should result in the debates this year, and the District Presbytery is donating a handsome shield, as a trophy for the winner of the county competitions. It is announced that there will be accomodation for all wishing to go. Leave your name with T. W. Findlay or Earl Best by Thursday noon.

RECEIVES $2,836 FOR 31 HEAD OF BEEF CATTLE

Angus Weber last fall bought a bunch of Western cattle, 28 in all, and put them in to fatten. On Tuesday last he sold them and found that they weighed 32,980 pounds, an average of a little over 1,175 pounds. They were sold at 8 cents per pound. Mr. Weber also sold a bull, weighing 1,790 pounds ,at 5 cents per pound. Two fine butcher heifers were sold to W. G. Oatman, one of the local butchers, at 6¼ cents per pound. The total amount obtained for the 31 head was $2836,65.

The cattle had done exceptionally well, having gained on the average about 60 pounds per head per month. An average gain of 50 pounds per month is generally considered to be doing well.—London Free Press.

The inventor of barbed wire has died at the age of 100. He didn't come in contact with the working end of his invention.

FISHING IN HYDRO LAKE AT EUGENIA OPEN THIS YEAR?

It is rumoured, but on good authority, that the public will be allowed to fish in the big hydro pond at Eugenia this summer. It is also stated that boats will be allowed on it. The fishing rights are to be allowed within a certain distance of the island game preserve.

Great quantities of trout fry have been placed in this pond by the Department of Game and Fisheries from Nipigon and other points within the province and fishing should be good but there are those who think that it will prove disappointing. It is thought by those who hold this view that the great quantity of decaying wood and vegetable matter contained in the pond have been fatal to piscatorial life. We hope this view will prove erroneous and that some good sport will result when the restrictions of the past have been removed.

For some years the question of reopening the lake for fish has been advocated and much discussion has taken place there-to, but no action could be secured. We think that the government will not make any mistake by so doing, and allow the people of the district surrounding the lake to indulge in the sport.

We believe that one would go a long way before they could find a lovelier spot for a summer home than around the lake at Eugenia, and with the lake open to boating and fishing will be an added incentive for people to build summer homes. With a beautiful memorial park and fine scenery at the Falls, interesting walks to the caves up the bed of the river; and below the falls, makes an ideal spot for rest and recreation.

We hope that in a few years the shores of the Hydro Lake at Eugenia will be lined with cottages of summer dwellers.

HYDRO POWER ON THE GEORGIAN BAY SYSTEM INCREASES

There is a steady increase in the demand for hydro power on the Georgian Bay Hydro System of which Flesherton forms a part. In the current issue of the Bulletin, the official publication of the H.E.P.C. of Ontario, the chairman, Mr. C. A. Magrath, deals with the progress of the Commission during the past year. In the course of his review he sets out his opening statement to these remarks, saying: It will be recalled that the various systems originally known as the Severn, Eugenia, Wasdell's and Muskoka were combined to constitute the Georgian Bay system. This system serves a territory adjacent to the Georgian Bay extending from Huntsville on the north to Uxbridge and Port Perry on the South and to Kincardine and Lake Huron on the west, and embraces an area approximately equal to the Commission's Niagara system. The past year was the first for the operation of this new consolidated system. The commission completed the extension to the South Falls generating station on the Muskoka River, which increases the output of this plant by approximately 3,500 horsepower. An additional extension is partially completed which will provide a new unit of approximately 2,000 horsepower at Hanna Chutes, thus making a combined increased capacity of about 5,000 horsepower on the Georgian Bay system. The total generating capacity serving the Georgian Bay district is about 25,000 horsepower.

St. John's W.M.S. Hold Thankoffering Meeting

The Easter Thankoffering held in St. John's church last Thursday was well attended, members being present from the Baptist Circle, Chalmer's auxiliary, and Inisitioge. The president, Mrs. Cargoe, occupied the chair After the devotional exercises, in which several members took part, Mrs. Blackburn and Mrs. Richardson sang, "I sing Because I'm happy." Mrs. Jack Perkins also favored the audience with a solo, and Mr. Leonard, who with Mr. Clements, had come from Inistioge, tendered two solos most expressively. Mrs. W. H. Thurston gave one sole reason why we should give a thankoffering at Easter for the cause of missions, namely our love for God who gave his son for us. Mrs. (Rev.) Preston carried greetings from the Circle and Miss MacMillan from Chalmer's auxiliary.

The speaker of the day was Mrs. S. Breese of Chatsworth, who has been District Superintendent of the Methodist W. M. S. Mrs. Breese is of a very pleasing personality, speaks distinctly, and knows her subject from A toZ, though she says there are a few letters she misses. She spoke about the stations which have come into the United Church from the three denominations represented, and gave a sketch of the manner of work each is endeavoring to do. The address was interesting and timely.

Mrs. Murray gave a recitation entitled, "Mary,' in a most acceptable way.

Lunch was served and a social time spent. The Thankoffering amounted to over fifty-five dollars.

If you can keep your disposition sweet and sunny, it is lots of fun to work in the post office. The other day a patron on one of the rural routes sewed his postage stamp on the letter. Possibly he didn't have any "stickem.'
