IN MEMORIAM

ANDERSON—In ever loving memory of our dear son, Pte. A. E. Anderson, 116th Battalion, killed in action at Cambrai, France, on October 1, 1918.

Far and oft our thoughts do wander
To a grave so far away,
Where they laid our brave boy,
Just two years ago to-day.

If we could have raised his dying head
Or heard his last farewell,
The grief would not have been so hard
For those who loved him well.

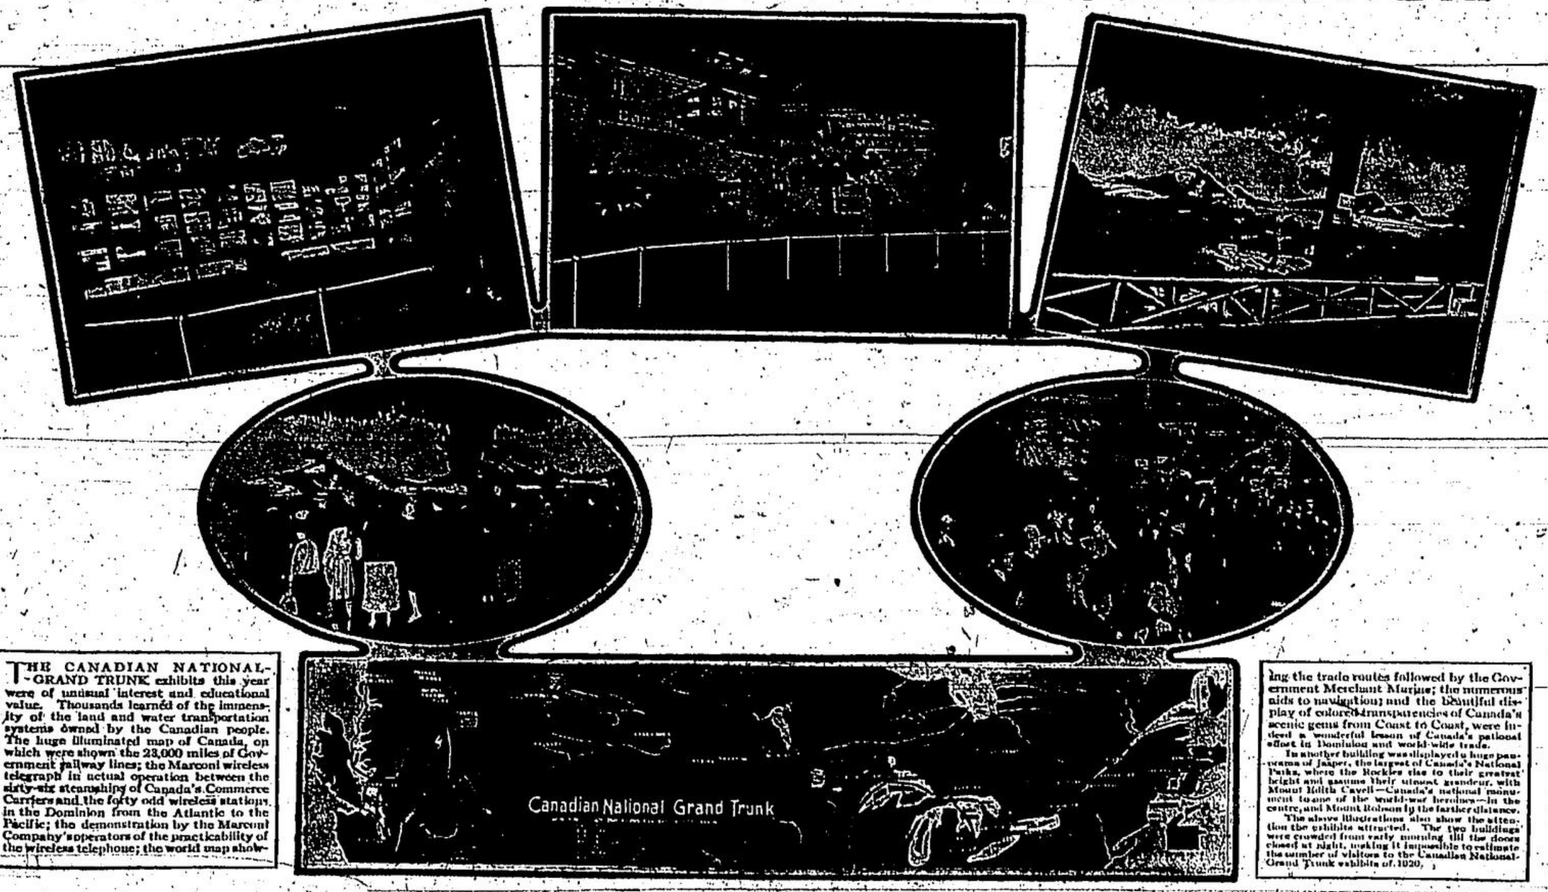
The National Railways at the Canadian National Exhibition.



THE CANADIAN NATIONAL-GRAND TRUNK exhibits this year were of unusual interest and educational value. Thousands learned of the immensity of the land and water transportation systems owned by the Canadian people. The huge illuminated map of Canada, on which were shown the 23,000 miles of Government railway lines; the Marconi wireless telegraph in actual operation between the sixty-six steamships of Canada's Commerce Carriers and the forty odd wireless stations in the Dominion from the Atlantic to the Pacific; the demonstration by the Marconi Company's operators of the practicability of the wireless telephone; the world map showing the trade routes followed by the Government Merchant Marine; the numerous aids to navigation; and the beautiful display of colored transparencies of Canada's scenic gems from Coast to Coast, were indeed a wonderful lesson of Canada's national effort in Dominion and world-wide trade.

In another building was displayed a huge panorama of Jasper, the largest of Canada's National Parks, where the Rockies rise to their greatest height and assume their utmost grandeur, with Mount Edith Cavell—Canada's national monument to one of the world-war heroines—in the centre, and Mount Robson in the farther distance.

The above illustrations also show the attention the exhibits attracted. The two buildings were crowded from early morning till the doors closed at night, making it impossible to estimate the number of visitors to the Canadian National-Grand Trunk exhibits of 1920.
