WHAT'S NEW...

What strange sights loom up at the summer cottage. The other day a Torontonion was seen simonizing his beautiful new Cadillac. An observer noticed that at times he was vigorously applying and rubbing on the liquid and then he would slow down to a waltz. Then the reason became apparent — the cottager had the radio in high gear and as the music went allegro and then into one-step time, the owner adopted the right rhythm at the right time. Try it — it sounds intriguing.

The local outposts and especially those living at summer cottage on Sturgeon Lake have been using three comparatively new roads this summer, which have proven interesting to sight-seers. One is the road leading past "Lungehaven", past Surf Harbour, which skirts to the rear of a new development in the area. The roads leads on to Carter's Cabins, Rustic Bay and Pleasant Point. Another road leading to Sturgeon Lake leaves No. 36 Highway west of Dunsford, follows through to Gilmar Lodge and thence along the shore to Greenhurst and to a number of cottages in the Pitts development. A third comparatively new road is to be found north and east of Dunsford where cars can be noticed travelling along the old CPR railway right of way (now minus the steel rails). The road angles off along the water to Bobcaygeon.
