Church News

METHODIST

The pastor will preach morning and evening next Sunday. Morning subject "The Conference, the Church and the Pastor." Special sermon to Odd Fellows at 7 p. m. All welcome.

PRESBYTERIAN

Rev. W. J. Booth of Hornby will occupy the pulpit of Knox Church next Sunday.

SAFETY FIRST.

Officers and employees of the Grand Trunk Railway are trying by every means in their power to prevent injuries to all persons, patrons, employees and others—But on looking into this subject they find that more than half of all persons killed on railways in Canada and United States are killed while trespassing on railway property. In this way in these two countries, fifteen persons are killed and about the same number injured for every day in the year.

Perhaps you may think that the 11,000 or more persons meeting with casualties every year while trespassing on railways are tramps or hobos, but the fact is that 80 per cent of them are useful citizens. Men walking on tracks to and from their places of work or business, children playing on the tracks or flipping cars comprise the greater part of the shameful slaughter.

To most people it seldom occurs that in walking on tracks they are taking any particular risk It seems so easy to see or hear a train and when one thinks about the subject at all, he likely concludes that while others may have been caught he will be more vigilant and escape.

Those injured and killed in this way are not the only ones who suffer. Their families being deprived of their earning power are called upon to bear a large share of the burden. The public is deprived of the service of this large army of persons and in a great percentage of cases are compelled to contribute to the care and maintenance of such persons and dependent members of their families.

In view, therefore, of these facts and in the interest of public safety, every person is earnestly requested not to walk on or along railroad tracks both on account of his own safety and for the sake of setting a good example to others. We ask parents to call this subject to the attention of their children and instruct them as to the danger of walking or playing on or about tracks and of flipping cars.

In this connection let us also call attention to another source of injury which is quite common, due to failure of persons to stop and look in both directions for approaching trains when about to cross tracks at highways and other places. Remember that trains may move on any tracks at any time. We do not believe that any person is so busy that he cannot take the few seconds before crossing a track to make sure that there is no approaching train. By all means never "duck under" crossing gates or cross tracks when warned not to do so by signal from flagman or other source.

Tuberculosis Lecture.

The lecture on the above subject given in the town hall on Thursday night by Mr. J. B. Watson, the Field-Secretary of the National Sanitorium Association, was not very largely attended. Rev. Mr. Higginson filled the chair and Mr. Grainger dexterously handled the lantern and slides used in illustration. The former part of the lecture covered the usual ground of instruction in an unusually interesting fashion and much information was given as to much that may be done to prevent the spread of this most insidious disease

The Consumptive Hospitals at Muskoka were shown in pictures with full explanation and the encouraging work there done was outlined. The Muskoka Free Hospital for Consumptives is regarded as the most important, because it gives care and treatment to the greatest number, and has the greatest number of cures; and further because it is the only institution in Canada that gives entirely free treatment to indigent consumptives. At present there are 218 patients in it taking the cure, 171 of whom pay nothing. Dependent, as it is upon the contributions received, appeal is made to all to help. Its maintenance this year will cost more than $100,000. Georgetown has heretofore done its share in this worthy campaign and it is hoped that the present appeal will not be in vain.

Within the past quarter century all civilized lands have been putting forth effort with a view to blotting out this dread disease and all countries have made some progress. This province of Ontario has made progress equal to any and surpassing most countries towards that goal, a reduction in the death rate from Consumption of over forty-five per cent is shown by the vital statistics. The hope is confidently entertained that in less than twenty years hence consumption will be a thing of the past in Ontario. All may be helpers in this commendable work by contributing in aid of the Muskoka Free Hospital, often referred to as Canada's greatest Charity.
