W. H. THURSTON, - Editor

PAVE ONE A YEAR

The Dundalk Hearld in its last issue had comment to make on the paving question which has been before Grey County council for several years now. Several towns and villages in the County requested pavement in 1928, among them Flesherton, but with the exception of Meaford the applications refused. In part The Hearld said:-

"Sooner or later the towns will all have pavements or streets much similar, and we believe the country legislators could do worse than allow one town or village in the county each year to pave. To decide the order in which these towns and villages could be paved is not for us to say. Grey County is behind the times as far as pavement is concerned. Dufferin has only one town and two villages and they can all boast of pavement. Grey with three towns and six villages can boast of pavement in but two of the towns and one of the villages. Paving costs a lot of money, but it pays in the long run."

We believe that the above suggestion is a logical one and would distribute building program over a unmber of years. The heavy east and west traffic over the county road through Flesherton and the situation of the village in the county should be a strong inducement to include Flesherton as one of the first villages to receive pavement through the County.

RAILWAY TRAVEL

The railways in Canada the past few years have been wonderfully free from any serious wrecks, but the one on the mainline of the C. P. R., between Dockhill, is one of the worst experienced for many years. Seven deaths are reported in the wreck and a score or more of people were injured. At the time of the accident the passenger train was travelling at a speed of about sixty miles per hour, and the impact was terrific, cars being strewn in all directions. No doubt a full investigation will be made into the causes of the accident and the blame laid in the proper place. Accidents of this kind are fortunately remote and the passenger on any railway line can travel with all assurance that accidents of any kind are exceedingly rare to cause any alarm.

The head of a big harvesting machinery corporation wants to get a divorce from his wife. He claims he has spent millions on her to get her launched on a successful theatrical career. This will be interesting news for the farmers who have put up the money to make these excess millions available.

NEWSPAPER A COMMUNITY ASSET

Everywhere there is a growing understanding among business men that the newspaper, while an individual business problem of some publisher, is at the same time a community asset. The newspaper serves the community more than a man who publishes. The time is coming when everywhere business will feel a personal interest in the newspaper's welfare. The fact has been shown that a community cannot make progress without it. It can exist but cannot grow.—Exchange.

FORD CAR KILLS DEER ON HIGHWAY

On Saturday night Mr. J. C. Clark, while motoring to Owen Sound, had the unique experience of seeing a deer killed by a car.

Mr. Clark was following a short distance behind a Ford car, and when about two miles north of Chastsworth the Ford apparently struck something on the highway. Mr. Clark on reaching the spot stopped to investigate and discovered a deer on the roadway with its legs broken. Just at this time the Francis' Bakery truck, in charge of Mr. Robt. Hamilton, came along and he and Mr. Clark loaded the deer on the truck and took it to Owen Sound, where it was handed over to the proper authorities. The driver of the Ford did not stop.—Chatsworth Banner.

Bazaar in Town Hall

The Ladies' Aid of the United church will hold their annual bazaar in the Town Hall on Saturday, December 10th beginning at 3 o'clock. There will be for sale besides fancy and plain articles, home-made candy baking, vegetables, etc.

Another newspaper is to be published in Kincardine.

Santa Claus will visit Flesherton on Saturday, Dec. 17th.

Painting and Decorating

Now that Fall is here you will spend more time in your homes. Why not have them freshly decorated and attractive looking? Do not wait till Spring to have your painting and decorating done. We can give you a better price on work done now than we can in the Spring when we are always rushed. Talk the matter over with us.

Phone 107, Dundalk, at my expense for ful information.

W. J. WELLWOOD

You wouldn't allow this, but—

—when you use an alcohol anti-freeze you expose your car to much worse damage. Even a wisp of its steam, even a splash when servicing the radiator, will ruin the finish—alcohol dissolves Duco or Lacquer finishes. Whiz Radiator Glycerine won't let this happen. It won't corrode, won't boil over, won't ignite and there is no loss from evaporation. Fill once for the whole winter.

Whiz contains no calcium chloride or other injurious chemicals.

Luxuries Once But Necessities Now

PRACTICALLY any Canadian citizen may own today an automobile possessing elements of beauty, style, comfort and efficiency which no amount of wealth could have commanded a dozen years ago.

For the automobile industry has outgrown its original function as a supplier of transportation, and has in an amazingly short time, brought about the refinements which are exemplified in the present-day General Motors car.

Since its foundations first were laid sixty years ago, this institution has believed that every Canadian has a right to the best his country produces, has a right to satisfy his sense of beauty, his desire for comfort, his need for dependability.

General Motors has at its command the master minds of the industry. It has the finest automotive research laboratories and the greatest automobile proving grounds in the world, wherein have been pioneered and developed some of the industry's most revolutionary advances.

And General Motors has used its prosperity and success unstintingly in improving the quality and increasing the value of its products. . . .

It is thus that General Motors of Canada has played its part in translating once-inconceivable luxury into terms of every-day necessity. . . .
